Description. The well known reliability of the Revox A77 is a result of a professional design concept, a concept which successfully combines the advantages of a solidly built tape transport mechanism with those of an advanced electronic circuit design. A 3 motor transport mechanism with electronically regulated capstan motor and solenoid operated servo brakes possesses few parts which are subject to mechanical wear.

Revox A77 3 Motor 2 Speed Reel to Reel Tape Recorder ...

Built from 1967 - 1977. The Revox A77 is still one of the most widely used semi-professional analog tape machines. Worldwide, about 450000 devices were built in innumerable variations. The device is considered particularly robust and service-friendly.

Since the capstan motor is servo-driven, there are no 50/60 Hz frequency adjustments on the A77 (nor other Revox machines of the same age or newer), as there are on some other contemporary reel-to-reel brands. Both of the above components carry the full capstan motor current and must therefore dissipate heat and thereby are most likely to fail.

Revox A-77 Tips

Among the most popular – and deservedly so – of the solid-state open-reel machines were the Revox A77 and B77. Like the equally coveted all-tube G36 that it replaced, the A77 launched in 1967 falls under the heading of “ semi-pro, ” and was equally popular at home and the studio.
