A history of the Korean War with soldier 's-eye views from both sides, by the Pulitzer Prize – winning author of The Rising Sun and Infamy. Pulitzer Prize – winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. In Mortal Combat is comprehensive in it discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. One of the most famous books in the history of photography, this volume assembles Cartier-Bresson's best work from his early years.

In this book, the authors explore and discuss the development of one of the most interesting and dynamic of photographic genres. Hailed as a landmark work when it was first published in 1994, Bystander is widely regarded by street photographers as the "bible" of street photography. It covers an incredible array of talent, from the unknowns of the late 19th century to the acknowledged masters of the 20th, such as Atget, Stieglitz, Strand, Cartier-Bresson, Brassai, Kertesz, Frank, Arbus, Wingrand, and Levitt to name just a few. In this new and fully revised edition, the story of street photography is brought up to date with a re-evaluation of some historical material, the inclusion of more contemporary photographers, and a discussion of the ongoing rise of digital photography.

Whether we're buying a pair of jeans, ordering a cup of coffee, selecting a long-distance carrier, applying to college, choosing a doctor, or setting up a 401(k), everyday decisions--both big and small--have become increasingly complex due to the overwhelming abundance of choice with which we are presented. As Americans, we assume that more choice means better options and greater satisfaction. But beware of excessive choice: choice overload can make you question the decisions you make before you even make them, it can set you up for unrealistically high expectations, and it can make you blame yourself for any and all failures. In the long run, this can lead to decision-making paralysis, anxiety, and perpetual stress. And, in a culture that tells us that there is no excuse for falling short of perfection when your options are limitless, too much choice can lead to clinical depression. In The Paradox of Choice, Barry Schwartz explains at what point choice--the hallmark of individual freedom and self-determination that we so cherish--becomes detrimental to our psychological and emotional well-being. In accessible, engaging, and anecdotal prose, Schwartz shows how the dramatic explosion in choice--from the mundane to the profound challenges of balancing career, family, and individual needs--has paradoxically become a problem instead of a solution. Schwartz also shows how our obsession with choice encourages us to seek that which makes us feel worse. By synthesizing current research in the social sciences, Schwartz makes the counter intuitive case that eliminating choices can greatly reduce the stress, anxiety, and busyness of our lives. He offers eleven practical steps on how to limit choices to a manageable number, have the discipline to focus on those that are important and ignore the rest, and ultimately derive greater satisfaction from the choices you have to make.

Thirty Years of Photographs by Alex Webb

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Review The images - rich in color and visual rhythm - span 30 years and several continents. Of course, Haiti and the Mexican border are well represented, locales that opened up a new way to see. He has been able to render Haiti - a place often depicted for its chaos - with a precise eye, finding personal moments that are as still as they are complex. He can use shadows as skillfully as a be-bop musician to set the tempo. The people in his frames can look like dwarfs being stomped on by giant, disembodied feet. He can make an American street seem far more foreboding than any Third World slum. (David Gonzalez The New York Times 2011-12-18) A 30-year retrospective of a great, and often overlooked, American pioneer of colour photography who pays scant regard to genre boundaries, merging art photography, photojournalism and often complex street photographs. (Sean O'Hagan The Guardian 2011-12-13) In far-flung corners of the globe, Webb captures glimpses of beauty in impoverished lives and stoicism in the face of strife.
