The breakdown of the family has moved in recent years to the forefront of national consciousness. All manner of social ills, from poor academic performance to teenage drug use and gang crime, have been attributed to high divorce rates and the collapse of the traditional two-parent family. Targets of particularly harsh criticism are parents who lose all contact with their children after a divorce. So-called "deadbeat dads" are denounced in political speeches and ridiculed on billboard advertisements; mothers who lose touch with their children are stigmatized as emotionally unstable or lacking maternal instincts. Everyone seems to understand the importance of children being raised by two-parent families and the damage that can occur when one parent loses contact completely. What is significantly less clear is why this loss of contact occurs and what can be done to prevent it. In *Out of Touch*, Geoffrey Greif explores these issues with clarity, compassion, insight, and an evenhandedness rarely encountered in an arena far more susceptible to acrimonious debate than sympathetic understanding. Setting out to find the reality beneath the catchall categorization of out-of-touch parents as deadbeats, substance abusers, child mistreaters, or criminals, Greif focuses on those parents who tried and, for a vast array of reasons, failed to maintain contact with their children. It is their voices, in a discussion dominated up till now by the custodial parent, that we most need to hear, Greif argues, if we are to uncover ways to avoid such failures in the future. Rather than offering dry statistics and abstract generalizations, Greif lets us hear these voices directly in 26 in-depth interviews with estranged parents and with children caught in the crossfire of painful divorces. Extending over a period of two to ten years, these interviews, and Greif's perceptive analyses of them, reveal the whole spectrum of logistical, emotional, and legal difficulties that keep parents and children apart. From the ordinary problems of visitation rights and child support to the more complex and troubling issues--bitter court battles, accusations of sexual abuse, domestic violence, children rejecting a parent, child kidnapping, and many others--*Out of Touch* vividly and often heartbreakingly presents all the ways that fathers and mothers, even with the best intentions, can lose contact with their children. But the book does more than tell the stories of failed relationships. Its concluding chapter offers a series of specific and extremely helpful suggestions for families--parents, children, grandparents--who find themselves in danger of complete estrangement. Greif outlines how families can employ support systems, communication skills, mediation, and many other strategies to overcome the most difficult obstacles that occur after a divorce. It is here that the lessons gleaned from the broken relationships of the past become invaluable advice for the future. Informed by fresh perspectives, moving personal accounts, and a clear-sighted approach to a tangled issue, *Out of Touch* is a timely and deeply important book about both the forces that drive parents and children apart and the understanding that can keep them together.

The physical haul of a letter gives the correspondence a mental weight that letters and messages simply don't have. Computerized correspondence is ethereal and transient and subsequently fits hasty and cocky transmissions. A letter, then again, is unmistakable proof that somebody has placed some idea into their composition. In such a situation, the author's own idea, the curiosity to know the unknown, the efforts of the scholars to entertain and raise awareness by combining the explanations of different scholars will be successful by reading this book. This book will be a companion to all those who are writing letters especially related to Bank. Letter composing is a fundamental ability. Notwithstanding the pervasiveness of messages and instant messages, everybody needs to compose letters sooner or later. Letters of grievance, employment forms, thank you letters, letters mentioning changes, or making proposals -- the rundown continues forever.

Composing letters energizes great social aptitudes, figuring out how to state thank you, and requesting data graciously. In English, there are various shows that ought to be utilized when composing a formal or business letter. Moreover, you attempt to compose as basically and as plainly as could reasonably be expected, and not to make the letter longer than would normally be appropriate. A letter is composed correspondence starting with one individual or association then onto the next.

In *Making Sense of War*, Amir Weiner reconceptualizes the entire historical experience of the Soviet Union from a new perspective, that of World War II. Breaking with the conventional interpretation that views World War II as a post-revolutionary addendum, Weiner situates this event at the crux of the development of the Soviet--not just the Stalinist--system. Through a richly detailed look at Soviet society as a whole, and at one Ukrainian region in particular, the author shows how World War II came to define the ways in which members of the political elite as well as ordinary citizens viewed the world and acted upon their beliefs and ideologies. The book explores the creation of the myth of the war against the historiography of modern schemes for social engineering, the Holocaust, ethnic deportations, collaboration, and postwar settlements. For communist true believers, World War II was the purgatory of the revolution, the final cleansing of Soviet society of the remaining elusive "human weeds" who intruded upon socialist harmony, and it brought the polity to the brink of communism. Those ridden with doubts turned to the war as a redemption for past wrongs of the regime, while others hoped it would be the death blow to an evil enterprise. For all, it was the Armageddon of the Bolshevik Revolution. The result of Weiner's inquiry is a bold, compelling new picture of a Soviet Union both reinforced and enfeebled by the experience of total war.

Over the last 25 years, reading processes have been the focus of an enormous amount of research in experimental psychology as well as in other disciplines. The theories and models emerging from this research have greatly advanced understanding of both normal acquisition and of reading disabilities. Although great progress has been made, there are certain aspects that have been relatively neglected in the current understanding. Specifically, the role of visual factors has received less attention than that of other component processes. This is particularly surprising since reading and writing are distinct from the other language processes of speaking and listening in large part by virtue of the fact that a visual dimension is involved. Relevant research is broadly scattered both geographically and in terms of disciplines, and there have been no major reviews or books concerned with the visual dimension of reading and reading disabilities. The purpose of this book is to bring together a broad range of evidence that concerns the role of visual information in reading and reading disabilities. Because reading processes are of central interest to cognitive scientists, neuropsychologists, psycholinguists, clinicians, and educators, this book should draw a very broad readership.

In *Pole Raising and Speech Making*, author Jennifer Eastman Attebery focuses on the beginnings of the traditional Scandinavian Midsummer celebration and the surrounding spring-to-summer seasonal festivities in the Rocky Mountain West during the height of Swedish immigration to the area—1880 – 1917. Combining research in folkloristics and history, Attebery explores various ways that immigrants blended traditional Swedish Midsummer-related celebrations with local civic celebrations of American Independence Day on July 4 and the Mormons' Pioneer Day on July 24. Functioning as multimodal observances with multiple meanings, these holidays represent and reconsider ethnicity and panethnicity, sacred and secular relationships, and the rural and the urban, demonstrating how flexible and complex traditional celebrations can be. Providing a wealth of detail and information surrounding little-studied celebrations and valuable archival and published primary sources—diaries, letters, speeches, newspaper reports, and images—*Pole Raising and Speech Making* is proof that non-English immigrant culture must be included when discussing “American” culture. It will be of interest to scholars and graduate students in ethnic studies, folklore, ritual and festival studies, and Scandinavian American cultural history.
