Ten laws of simplicity for business, technology, and design that teach us how to need less but get more. Finally, we are learning that simplicity equals sanity. We're rebelling against technology that's too complicated. DVD players with too many menus, and software accompanied by 75-megabyte "read me" manuals. The iPod's clean gadgetry has made simplicity hip. But sometimes we find ourselves caught up in the simplicity paradox: we want something that's simple and easy to use, but also does all the complex things we might ever want it to do. In *The Laws of Simplicity*, John Maeda offers ten laws for balancing simplicity and complexity in business, technology, and design—guidelines for needing less and actually getting more. Maeda—a professor in MIT's Media Lab and a world-renowned graphic designer—explores the question of how we can redefine the notion of "improved" so that it doesn't always mean something more, something added on. Maeda's first law of simplicity is "Reduce." It's not necessarily beneficial to add technology features just because we can. And the features that we do have must be organized (Law 2) in a sensible hierarchy so users aren't distracted by features and functions they don't need. But simplicity is not less just for the sake of less. Skip ahead to Law 9: "Failure: Accept the fact that some things can never be made simple." Maeda's concise guide to simplicity in the digital age shows us how this idea can be a cornerstone of organizations and their products—how it can drive both business and technology. We can learn to simplify without sacrificing comfort and meaning, and we can achieve the balance described in Law 10. This law, which Maeda calls "The One," tells us: "Simplicity is about subtracting the obvious, and adding the meaningful."

Now beyond its eleventh printing and translated into twelve languages, Michael Porter 's *The Competitive Advantage of Nations* has changed completely our conception of how prosperity is created and sustained in the modern global economy. Porter 's groundbreaking study of international competitiveness has shaped national policy in countries around the world. It has also transformed thinking and action in states, cities, companies, and even entire regions such as Central America. Based on research in ten leading trading nations, *The Competitive Advantage of Nations* offers the first theory of competitiveness based on the causes of the productivity with which companies compete. Porter shows how traditional comparative advantages such as natural resources and pools of labor have been superseded as sources of prosperity, and how broad macroeconomic accounts of competitiveness are insufficient. The book introduces Porter 's "diamond," a whole new way to understand the competitive position of a nation (or other locations) in global competition that is now an integral part of international business thinking. Porter's concept of "clusters," or groups of interconnected firms, suppliers, related industries, and institutions that arise in particular locations, has become a new way for companies and governments to think about economies, assess the competitive advantage of locations, and set public policy. Even before publication of the book, Porter 's theory had guided national reassessments in New Zealand and elsewhere. His ideas and personal involvement have shaped strategy in countries as diverse as the Netherlands, Portugal, Taiwan, Costa Rica, and India, and regions such as Massachusetts, California, and the Basque country. Hundreds of cluster initiatives have flourished throughout the world. In an era of intensifying global competition, this pathbreaking book on the new wealth of nations has become the standard by which all future work must be measured.

A brilliantly written family epic that won France's Prix Femina and was shortlisted for the Orange Prize. "An immaculate novel" (The Guardian). In a profound and poetic story, internationally acclaimed and bestselling author Nancy Huston traces four generations of a single family from present-day California to WWII-era Germany. *Fault Lines* begins with Sol, a gifted, terrifying child whose mother believes he is destined for greatness partly because he has a birthmark like his dad, his grandmother, and his great-grandmother. When Sol's family makes an unexpected trip to Germany, secrets begin to emerge about their history during World War II. It seems birthmarks are not all that's been passed down through the bloodlines. Closely observed, lyrically told, and epic in scope, *Fault Lines* is a touching, fearless, and unusual novel about four generations of children and their parents. The story moves from the West Coast of the United States to the East, from Haifa to Toronto to Munich, as secrets unwind back through time until a devastating truth about the family's origins is reached. Huston tells a riveting, vigorous tale in which love, music, and faith rage against the shape of evil. "Huston's powerful novel combines the pacing of a thriller with the emotional intricacies that are the hallmark of the best family stories." —Booklist, starred review

Set against the tumultuous political backdrop of late '60s Chicago, *My Favorite Thing Is Monsters* is the fictional graphic diary of 10-year-old Karen Reyes, filled with B-movie horror and pulp monster magazines iconography. Karen Reyes tries to solve the murder of her enigmatic upstairs neighbor, Anka Silverberg, a holocaust survivor, while the interconnected stories of those around her unfold. When Karen's investigation takes us back to Anka's life in Nazi Germany, the reader discovers how the personal, the political, the past, and the present converge.

Ride. Protect. Defend.Anna Kloss grew up as a smart girl in the Sinister Knights Motorcycle Club, an above-the-law group of misfits that fights to safeguard the women of their town. Straddling both worlds, she's lived the last few years in a college dorm, losing herself in the promise of her future and trying to forget the lost love of her past. As Vice President of the Sinister Knights, Ryker Beckett has proven his dedication and loyalty by sitting in a county jail cell for three years for saving one woman from a nightmarish assault. The woman. The only one who matters. Prez's young, innocent, and untouched daughter, Anna. But now, Ryker is back, his sights set on reconnecting with the woman who occupied every minute of his thoughts while he was away. Anna's all grown up, but she's still the only one he can't have, the only one he craves... Is she ready for this giant, rough-around-the-edges biker to protect and defend her forever? Warning: Ryker is hard in all the right places-a tall, tattooed drink of water sitting on a powerful engine. He's got his mind on one woman only, and when he sees her again, he's determined to get her bried and on his bike for their sultry ride into the sunset.

This topical new book provides an illuminating overview of enterprise education, and poses the question as to whether current establishments have adequate systems in place to prepare students for the world of work. Addressing the increasing need for graduates with practical skills and expertise in the labour market, this collection of insightful chapters analyses the opportunities that are available for aspiring entrepreneurs to develop enterprise skills and experience key aspects of starting and running a business, whilst in a supported environment such as an educational program or incubator scheme. With comprehensive discussion of higher education initiatives and empirical examples of experiential learning in the workplace, this book is an important and timely read for those researching business enterprise, entrepreneurship and higher education more generally.

There's nothing easy about apology. The news is filled with examples of leaders apologizing, needing to apologize, or failing miserably at the attempt. And certainly we all have occasion to apologize ourselves—maybe more often than we realize. But we don't need more apologies, says John Kador—we need better ones. Too many people just go through the motions, missing out on the power of apology to restore strained relationships, create possibilities for growth, and generate better outcomes for all. *Effective Apology* challenges you to think about the fundamental value and importance of apology as it delivers detailed advice for making an apology that truly heals and renews. Kador explores the Five Rs of apology: Recognize the wrong and the person harmed; accept moral Responsibility for your actions; express Remorse; provide meaningful Restitution; and offer assurance that the offense will not be Repeated. Making apology work in the real world—when and how to apologize, in what medium, and how to make it stick—is made clear through over seventy examples of good and bad apologies drawn from the news, popular culture, and the experiences of Kador, his clients, and his friends. The willingness to apologize signals strength, character, and integrity. Effective leadership is impossible without effective apology. John Kador shows how to craft and deliver a confident apology that will defuse resentment, reduce litigation, create goodwill, and transform a relationship ruptured by mistrust and disappointment into something stronger and more durable than it ever was before.

Japan's Strategic Thinking about Continental Asia Before August 1945

The Little Book of Being Brilliant

Mending Fences, Building Bridges, and Restoring Trust

The "Pacific War" narrative of Japan's defeat that was established after 1945 started with the attack on Pearl Harbor, detailed the U.S. island-hopping campaigns across the Western Pacific, and culminated in the atomic bombings of Hiroshima and Nagasaki, Japan's capitulation, and its recasting as the western shore of an American ocean. But in the decades leading up to World War II and over the course of the conflict, Japan's leaders and citizens were as deeply concerned about continental Asia—and the Soviet Union, in particular—as they were about the Pacific theater and the United States. In *Imperial Eclipse*, Yukiko Koshiro reassesses the role that Eurasia played in Japan's diplomatic and military thinking from the turn of the twentieth century to the end of the war. Through unprecedented archival research, Koshiro has located documents and reports expunged from the files of the Japanese Cabinet, ministries of Foreign Affairs and War, and Imperial Headquarters, allowing her to reconstruct Japan's official thinking about its plans for continental Asia. She brings to light new information on the assumptions and resulting plans that Japan's leaders made as military defeat became increasingly certain and the Soviet Union slowly moved to declare war on Japan (which it finally did on August 8, two days after Hiroshima). She also describes Japanese attitudes toward Russia in the prewar years, highlighting the attractions of communism and the treatment of Russians in the Japanese empire; and she traces imperial attitudes toward Korea and China throughout this period. Koshiro's book offers a balanced and comprehensive account of imperial Japan's global ambitions.

"Fake news existed long before Donald Trump... What is ironic is that fake news has indeed been the only news disseminated by the rulers of U.S. empire."—From *American Exceptionalism and American Innocence* According to Robert Sirvent and Danny Haiphong, Americans have been exposed to fake news throughout our history—news that slavery is a thing of the past, that we don't live on stolen land, that wars are fought to spread freedom and democracy, that a rising tide lifts all boats, that prisons keep us safe, and that the police serve and protect. Thus, the only "news" ever reported by various channels of U.S. empire is the news of American exceptionalism and American innocence. And, as this book will hopefully show, it's all fake. Did the U.S. really "save the world" in World War II? Should black athletes stop protesting and show more gratitude for what America has done for them? Are wars fought to spread freedom and democracy? Or is this all fake news? *American Exceptionalism and American Innocence* examines the stories we're told that lead us to think that the U.S. is a force for good in the world, regardless of slavery, the genocide of indigenous people, and the more than a century's worth of imperialist war that the U.S. has wrought on the planet. Sirvent and Haiphong detail just what Captain America's shield tells us about the pretensions of U.S. foreign policy, how Angelina Jolie and Bill Gates engage in humanitarian imperialism, and why the Broadway musical *Hamilton* is a monument to white supremacy.

Theoretical and Practical Perspectives on Enterprise Education

A Challenging Concept

This book examines the implications of new communication technologies in the light of the most recent work in social and cultural theory and argues that new developments in electronic media, such as the Internet and Virtual Reality, justify the designation of a "second media age".

This book is the first work that comprehensively presents the accounts of Lia Eden, a former flower arranger who claims to have received divine messages from the Archangel Gabriel and founded the divine Eden Kingdom in her house in Jakarta. This book places Lia Eden's prophetic trajectory in the context of diverse Indonesian spiritual and religious traditions, by which hundreds of others also claimed to have been commanded by God to lead people and to establish religious groups. This book offers a fresh approach towards the rich Indonesian religious and spiritual traditions with particular attention to the accounts of the emergence of indigenous prophets who founded some popular religions. It presents the history of prophetic tradition which remains alive in Indonesian society from the colonial to reform period. It also explores the ways in which these prophets rebelled against two hegemonies: colonial power in the past and Islamic orthodoxy in the present. The discussion of this book focuses on Lia Eden including her biography, claims to prophethood and divinity, the development of her group Eden Kingdom, her challenge to Islamic orthodoxy under the banner of the MUI (Indonesian Ulama Council), her persecution by radical groups, her experiences in court trials and imprisonment, and public responses to her emergence. The discussion also covers other themes currently drawing public attention in Indonesia, such as pluralism, religious freedom, tolerance, discrimination against minorities, and secularisation.

This publication highlights good practice in corporate governance transparency and reporting, with a view to assisting developing countries and countries with economies in transition to identify and implement good corporate governance disclosure practices relevant to most business enterprises. It draws on recommendations made in guidelines produced by the OECD and the International Corporate Governance Network (ICGN), as well as past International Standards of Accounting and Reporting (ISAR) conclusions. This publication is an updated version of the UNCTAD 2002 report "Transparency and disclosure requirements for corporate governance" (TD/B/COM.2/ISAR/15).
