“ A good read for
anyone who wants to
understand what

Page 6/48

actually determines whether a developing economy will succeed ” (Bill Gates, “ Top 5 Books of the Year ”). An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who The Financial Times said “ should be named chief myth-buster for Asian business. ” In

Page 7/48

How Asia Works, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows

Page 8/48

what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished.

Studwell ' s in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-

Page 9/48

start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues.

Instead, countries need “ export discipline, ” a government that forces companies to compete on the global scale. And in finance, effective

Page 10/48

regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron ' s stifling of reform to the explosive growth at a Korean steel mill. “ Provocative . . . How Asia Works is a striking and

Page 11/48

enlightening book . . . A
lively mix of scholarship,
reporting and
polemic. ” —The
Economist

This edited book
provides an in-depth

Page 12/48

overview of carbon dioxide (CO₂) transformations to sustainable power technologies. It also discusses the wide scope of issues in engineering avenues, key designs, device fabrication, characterizations, various types of conversions and related

Page 13/48

topics. It includes studies focusing on the applications in catalysis, energy conversion and conversion technologies, etc. This is a unique reference guide, and one of the detailed works is on this technology. The book is the result of commitments by

Page 14/48

leading researchers from various backgrounds and expertise. The book is well structured and is an essential resource for scientists, undergraduate, postgraduate students, faculty, R&D professionals, energy chemists and industrial experts.

This introduction to
ISDN has been
revised and expanded
for this edition. It

Page 16/48

places special
emphasis on ATM and
Frame Relay
applications, products
and services. New
material is included on
NI (National ISDN)
and AIN (Advanced
Intelligent Network).
There is
From Given Growth
to Policy-aided Value
Creation

Page 17/48

Learning to
Industrialize
Science Abstracts
Adres Moskva
This book
proposes a new,
pragmatic way of
approaching
economic
development
which features
policy learning
based on a

Page 18/48

comparison of international best policy practices. While the important role of government in promoting private sector development is being recognized, policy discussion often remains general without

Page 19/48

details as to what exactly to do and how to avoid common pitfalls. This book fills the gap by showing concrete policy contents, procedures, and organizations adopted in high-performing East Asian economies.

Page 20/48

Natural resources and foreign aid and investment can take a country to a certain income level, but growth stalls when given advantages are exhausted.

Economies will be caught in middle income traps if

Page 21/48

growth impetus is not internally generated.

Meanwhile, countries that have soared to high income introduced mindset, policies, and institutions that encouraged, or even forced, accumulation of

human capital –
skills, technology,
and knowledge.
How this can be
done
systematically is
the main topic of
policy learning.
However,
government
should not
randomly adopt
what Singapore or

Taiwan did in the past. A continued march to prosperity is possible only when policy makers acquire capability to formulate policy suitable for local context after studying a number of international

Page 24/48

experiences.
Developing
countries wanting
to adopt effective
industrial
strategies but not
knowing where to
start will benefit
greatly by the
ideas and hands-
on examples
presented by the
author. Students

Page 25/48

of development economics will find a new methodological perspective which can supplement the ongoing industrial policy debate. The book also gives an excellent account of national pride and pragmatism

Page 26/48

exhibited by
officials in East
Asia who
produced
remarkable
economic growth,
as well as serious
effort by an
African country to
emulate this
miracle.

Management
Case Book
Computerworld
This book
provides a
perspective on
knowledge
management at
Siemens - an
internationally
recognised
benchmark - by

Page 31/48

presenting the reader with the best of the corporation's practical applications and experiences. Tom Davenport and Gilbert Probst bring together instructive case studies from different areas

Page 32/48

that reflect the rich insights gained from years of experience in practising knowledge management.

Most of the cases have been updated for the second edition. New cases have been added. The

Knowledge
Management Case
Book provides a
comprehensive
account of how
organisational
knowledge assets
can be managed
effectively.
Specific emphasis
is given to the
development of
generic lessons

Page 34/48

that can be
learned from
Siemens'
experience. The
book also offers a
roadmap to
building a "mature
knowledge
enterprise",
thereby enhancing
our understanding
of the steps that
need to be taken

Page 35/48

in order to sustain competitive dominance in the knowledge economy.

Presenting applications from very different areas, this practice-orientated book is really outstanding in the broad field

Page 36/48

of KM literature.
"Perhaps the most revealing - and interesting - part of the cases in this book is not the analysis of the various knowledge management tools and processes, but the description of their development,

Page 37/48

of how they come about, of how commitment was gained, of how implementation was led." Yves Doz, The Timken Chaired Professor of Global Technology and Innovation at INSEAD, Fontainebleau

Page 38/48

"This case book brings insights how our most valuable resource makes those tools happen. I found this book exciting reading, because it is, to my knowledge, the only book where a single company with a wide

Page 39/48

variety of
knowledge
management
approaches
accumulates years
of experiences
and lessons
learned. Edited by
two of the leading
thinkers in the
field of knowledge
management, this
book will show the

Page 40/48

way you practise
knowledge
management in
your company."
Heinz Fischer,
Global Head of
HR, Deutsche
Bank AG "This
book is a rare and
valuable
description of a
single company's
knowledge

Page 41/48

management
journey. Siemens
has made
impressive
advances in
becoming a
knowledge-driven
firm, and this
volume details
many of its
directions and
waystations."

Laurence Prusak,
