With this guide, readers will get an inside perspective on St.

Louis--the city's more than 170 parks, a thriving live music and local arts scene, an abundance of nightclubs and casinos, and world-

class sports teams, not to mention the Gateway Arch.

Placing theme parks from the United States, Europe and Asia in a comparative, multidisciplinary framework, this fascinating book argues that these fantasy environments are an extreme example of the totalization of public space. By illuminating the relationship between theme parks and public space, the book offers an insight into the

ethos, design and expectations of public space in the twenty-first century.

"Four hundred years after
Kepler discovered his third
law of planetary motion,
disproving the Pythagorean
notion of 'the music of the
spheres', music was
discovered in the Sun. With
this discovery the science

of helioseismology was born." "In Music of the Sun, renowned helioseismologist William Chaplin tells the story of this discipline's origins and gives us invaluable insight into its implications - not only for better understanding the distant sun and stars - but for climate change, particle physics, and the very relationship between the Sun and the Earth."--BOOK JACKET.

"Neoconservatism: Why We Need It mounts a vigorous defense of the most controversial political philosophy of our age. In this book,

the British commentator Douglas Murray takes a fresh look at the movement that replaced Great Society liberalism, helped Ronald Reagan bring down the Wall, and provided the intellectual rationale for the Bush administration's War on Terror."

"Neoconservatism: Why We Need It is essential reading for anyone who wants to understand the core ideals that have guided American foreign policy at the dawn of

the twenty-first
century."--BOOK JACKET.
