

Skill Acquisition In Sport Research Theory And Practice

Products - Routledge

As an interdisciplinary science, skill acquisition engages experts in neuroscience, physiology, psychology, biomechanics, and coaching, as an avenue to research how the neuromuscular system functions to activate and coordinate the muscles and limbs involved in the performance of a motor skill.

Skill Acquisition in Sport examines how we learn such skills and, in particular, considers the crucial role of practice and instruction in the skill acquisition process (Lewis, 2014).... What is...
