Ethics of technology is a sub-field of ethics addressing the ethical questions specific to the Technology Age, the transitional shift in society where personal computers and subsequent devices have been introduced to provide users an easy and quick way to transfer

information. Ethics in technology has become an evolving topic over the years as technology has development.

This ethical and moral debate is

grounded in the design and development of new technologies - long before their introduction into society. Through the research strand Ethics & Technology, we seek to teach and advise both engineers and policy makers regarding the possible and plausible impact of new technologies, as well as the general public, and to investigate the societal impact of such technologies through objective and scientific methods.
