2 Introduction About This Handbook This HP 12C Platinum Solutions Handbook has been designed to supplement the HP 12C Platinum Owner's Handbook by providing a variety of applications in the financial area. Programs and/or step-by-step keystroke procedures with corresponding examples in each

1. Write R programs to generate Geometric(p) and Negative Binomial(i,p) random variables. Solution: To generate a Geometric random variable, we run a loop of Bernoulli trials until the first success occurs. Kcounts the number of failures plus one success, which is equal to the total number of trials.
