Although it is generally accepted that there is a growing demand for multinational and pan European databases, there is little available on the problems encountered in different types of multinational geographic information applications, nor has there been much discussion of the broader legal and constitutional issues involved at the supranational

This book presents recently developed intelligent techniques with applications and theory in the area of quality management. The involved applications of intelligence include techniques such as fuzzy sets, neural networks, genetic algorithms, etc. The book consists of classical quality management topics dealing with intelligent techniques for solving the complex quality management problems. The book will serve as an excellent reference for quality managers, researchers, lecturers and postgraduate students in this area. The authors of the chapters are well-known researchers in the area of quality management.

The Aesthetics and Ethics of Copying responds to the rapidly changing attitudes towards the use of another's ideas, styles, and artworks. With advances in technology making the copying of artworks and other artefacts exponentially easier, questions of copying no longer focus on the problems of forgery: they now expand into aesthetic and ethical legal concerns. This volume addresses the changes and provides the first philosophical foundation for an aesthetics and ethics of copying. Scholars from philosophy of art, philosophy of technology, philosophy of law, ethics, legal theory, media studies, art history, literary theory, and sociology discuss the role that copying plays in human culture, confronting the question of how-and why-copying fits into our broader system of values. Teasing out the factors and conceptual distinctions that must be accounted for in an ontology of copying, they set a groundwork for understanding the nature of copies and copying, showing how these interweave with ethical and legal concepts. Covering unique concerns for copying in the domain of artworks, from music and art to plays and literature, contributors look at work by artists including Heinrich von Kleist, Robert Rauschenberg, Courbet and Manet and conclude with the normative dimensions of copying in the twenty-first century. By bringing this topic into the philosophical domain and highlighting its philosophical relevance, The Aesthetics and Ethics of Copying establishes the complex conditions-ontological, aesthetic, ethical, cultural, and legal-that underlie and complicate the topic. The result is a timely collection that establishes the need for further discussion.

"Understanding History Teaching is an enjoyable read with a logical and flowing structure. It lives up to its goal of appealing to both academic and professional readers with both academic depth and real insights and opportunities for the professional teacher to draw from. It presents its data and interpretations in a manner which does not avoid the issues revealed within the research but has an uplifting effect on the reader and leaves them feeling optimistic about the quality of History teaching in UK secondary schools." Robert Wyness, Student, De Montfort University, Leicester, UK * Why do we teach and learn about the past? * How is history taught in schools? * What are the influences on the way teachers teach and pupils learn about the past? History is one of the most ideologically disputed of school subjects. Over the past generation, the subject has experienced fundamental changes in content, pedagogy and approach. This book is the first detailed account of the way history is taught in schools to be published for 30 years. Drawing on fieldwork in comprehensive schools, and on research studies worldwide, the authors pose fundamental questions about the way teachers teach and learners learn. They consider its purposes on teaching about the past in a world of accelerating change. The book sets out to explore the realities of classroom history teaching and to offer pointers for the development on the subject in a new century.

Similarity and Difference in Translation

In a path-breaking work, Tanya Aplin and Lionel Bently make the case that the quotation exception in Article 10 of the Berne Convention constitutes a global, mandatory, fair use provision. It is global, they argue, because of the reach of Berne qua Berne and qua TRIPS, and its mandatory nature is apparent from the clear language of Article 10 and its travaux. It relates to 'use' that is not limited by type of work, type of act, or purpose and it is 'fair' use because the work must be made available to the public, with attribution, and the use must be proportionate and consistent with fair practice. By explaining the contours of global, mandatory fair use - and thus displacing the 'three-step test' as the dominant, international copyright norm governing copyright exceptions - this book creates new insights into how national exceptions should be framed and interpreted.

This e-book contains the 2013 Revision of RDA: Resource Description and Access, and includes the July 2013 Update. This e-book offers links within the RDA text and the capability of running rudimentary searches of RDA, but please note that this e-book does not have the full range of content or functionality provided by the subscription product RDA Toolkit. Included: A full accumulation of RDA the revision contains a full set of all current RDA instructions. It replaces the previous version of RDA Print as opposed to being an update packet to that version. RDA has gone through many changes since it was first published in 2010. Cataloging practice described by RDA has not changed dramatically due to the changes above, but nearly every page in RDA Print was impacted by the changes, with the result that an RDA Print update packet would require nearly as many pages as the full revision. The most current RDA the revision contains all changes to RDA up to and including the 2013 RDA Update approved by the JSC. Annually the JSC considers proposals to update, enhance and maintain RDA as a current cataloging standard. These updates can and often do change the cataloging process as described by RDA. The JSC also periodically issues changes to RDA to fix errors and to clarify meaning. These changes do not typically change cataloging practice as described by RDA. Reworded RDA the revision includes the reworded version of RDA instructions. To improve readability and comprehension of complex instructions, RDA has been edited and reworded since its original release. The rewording was carried out by the JSC, RDA Copy Editor, and reviewed by the U.S. RDA Test Coordinating Committee.

An invaluable contribution to esoteric scholarship, this classic text comprises an exact and complete transcription of a rare 17th century volume on Angel Magic. With editor Adam McLean's concise and illuminating observations, A Treatise on Angel Magic constitutes one of the most important links between John Dee and the late 19th century schools of occult-The Golden Dawn, Aurum Solis, and the O.T.O founded by Aleister Crowley. McLean distinguishes this edition from many other books in this field in that he does not present merely one viewpoint on western esoterica and the study of Angel Magic but encompasses all of the important thinking on these topics present in medieval times and

those of the Renaissance. Rich with charts and explanatory diagrams, *A Treatise on Angel Magic* is a primary source work in hermetics. This volume is a great bringing together of several seminal texts not available anywhere else. McLean transcribes and preserves in its entirety one of the most important occult manuscripts in the British Library, Harley 6482, which includes wondrous sections of the Schemhamphoras, the hierarchies of fallen angels, rapturous Images of the Mansions of the Moon, evocation of the Nature Spirits, and John Dee's Enochian system of Angel conjuration. This volume concludes with Dr. Rudd's *Treatise on the Nine Hierarchies of Angels and their conjuration to visible appearance*. This book is an outstandingly complete source work on Angel Magic, and the correspondence and symbolism essential to the practice of angelology. Book jacket. Based on the past 30-years' research on the technical and cultural values of China's Grand Canal, this book, based on interdisciplinary research, studies the natural and social background of the evolution and development of different sections of the Grand Canal in different historical periods, as well as the interrelations between the Grand Canal and the Chinese politics, economics, and culture. It also assesses the effects of the Grand Canal on the progress of the Chinese civilization, engineering technology achievement, the natural environment, and the society, providing the readers with an understanding of China's Grand Canal from the perspectives of hydraulic engineering and history.

From Postgraduate to Social Scientist is essential reading for any postgraduate or new researcher who is interested in a career in the social sciences. The book describes the skills needed for success in moving from being a student to becoming an academic or professional social scientist. Written by experts in the field, Gilbert et al. offer a unique insider's view of how to make the transition. By adopting a clear and accessible approach, this book encourages students embarking on the journey towards becoming a social scientist to engage with every aspect of the process: - Reviewing and writing skills - Using the Internet - Research ethics - Intellectual property rights - Writing research proposals - Project management - Writing a thesis and reports - Creating presentations, press releases and popular articles - Teaching skills - Careers in social science *From Postgraduate to Social Scientist* is designed for postgraduate students and researchers across the social sciences. It will be invaluable for courses that aim to satisfy the Economic and Social Research Council's 'Training Guidelines' requirements for doctoral programmes. SAGE Study Skills are essential study guides for students of all levels. From how to write great essays and succeeding at university, to writing your undergraduate dissertation and doing postgraduate research, SAGE Study Skills help you get the best from your time at university.

The 'knowledge turn' in curriculum studies has drawn attention to the central role that knowledge of the disciplines plays in education, and to the need for new thinking about how we understand knowledge and knowledge-building. *Knowing History in Schools* explores these issues in the context of teaching and learning history through a dialogue between the eminent sociologist of curriculum Michael Young, and leading figures in history education research and practice from a range of traditions and contexts. With a focus on Young's 'powerful knowledge' theorisation of the curriculum, and on his more recent articulations of the 'powers' of knowledge, this dialogue explores the many complexities posed for history education by the challenge of building children's historical knowledge and understanding. The book builds towards a clarification of how we can best conceptualise knowledge-building in history education. Crucially, it aims to help history education students, history teachers, teacher educators and history curriculum designers navigate the challenges that knowledge-building processes pose for learning history in schools.

The ingredients for success in starting and developing a technology-based company aren't obvious. Why, for example, did Digital Equipment Corporation succeed--and indeed become one of the most successful high-tech corporations in the world--while dozens of other companies with similar beginnings fail? It is a question that demands careful consideration by anyone setting up a new company or who is interested in starting one. In *Entrepreneurs in High Technology*, Edward Roberts, a Professor at the MIT Sloan School of Management, offers entrepreneurs a goldmine of information on starting, financing, and expanding a high-tech firm. His book reveals the results of research conducted over twenty-five years on several hundred high-tech firms, and it reflects the insights of the author's own first-hand experience as a company founder, director, and venture capitalist. Focusing on firms in the Greater Boston area--many of which have had technological links with MIT--Roberts traces the origins and the evolution of the high-technology failures and successes. He examines the work experience and family backgrounds of successful technical entrepreneurs, their sources of funding, and the ways they respond to the challenge of business growth. He compares the track records of firms with multi-founder teams and firms with individual founders, contrasts the performance of consulting

firms and research-and-development contractors against companies that start out with a product, identifies the factors that limit an enterprise's ability to raise outside capital, and explores the critical influence of marketing orientation on successful companies. In a penetrating analysis of highly successful ventures, the author reveals the importance of strategically transforming the company to a market-oriented focus, and he examines the widespread tendency, even among the most successful high-tech firms, to displace the founder before the company achieves "super-success." For anyone planning to start a technology-based enterprise, *Entrepreneurs in High Technology* is essential reading--an invaluable preview of the financial, organizational, and marketing issues that confront every new high-tech venture. For business and technology watchers, it is an informative account of the promise and the perils entailed in bringing innovative ideas to the marketplace. Succeed @ Work by accessing the Source within you Had it been a few years ago, Karmant would have savoured the serenity of the beach. But today, he was too preoccupied to sense these delights of nature. "I wish life were that easy... that the waters of time would wash away the mistakes made in the sands of life," he thought. He was unhappy thinking about his work and his life. "What am I doing wrong? Why is it so difficult to succeed at work? Why do I always mess up in my communication? I don't mean anyone any harm. Why do I always have to deal with people who irritate and anger me? I am a real failure, a misfit in the office and at home as well. I haven't been a good father or a supportive husband... being a good manager is still farfetched. Will I ever find inspiration at work and happiness in life?" What happens to Karmant? Does he rise above his uninspiring work-life and attain harmony at the workplace and at home? Join Karmant in his encounters with Jeeodee, a surprising source of inspiration and be inspired in turn to thrive at work. You may realize that your own source of inspiration is not very far away...

A Practical Guide to Viewpoints and Composition

The Nature and Scope of the Right to Quote Copyright Works

Intelligent Decision Making in Quality Management

How the Supreme Court of Canada Shook the Foundations of Canadian Copyright Law

Entrepreneurs in High Technology

Powerful knowledge and the powers of knowledge

In the summer of 2012, the Supreme Court of Canada issued rulings on five copyright cases in a single day. The cases represent a seismic shift in Canadian copyright law, with the Court providing an unequivocal affirmation that copyright exceptions such as fair dealing should be treated as users' rights, while emphasizing the need for a technology neutral approach to copyright law. The Court's decisions, which were quickly dubbed the "copyright pentalogy," included no fees for song previews on services such as iTunes, no additional payment for music included in downloaded video games, and that copying materials for instructional purposes may qualify as fair dealing. The Canadian copyright community soon looked beyond the cases and their litigants and began to debate the larger implications of the decisions. Several issues quickly emerged. This book represents an effort by some of Canada's leading copyright scholars to begin the process of examining the long-term implications of the copyright pentalogy. The diversity of contributors ensures an equally diverse view on these five cases, contributions are grouped into five parts. Part 1 features three chapters on the standard of review in the courts. Part 2 examines the fair dealing implications of the copyright pentalogy, with five chapters on the evolution of fair dealing and its likely interpretation in the years ahead. Part 3 contains two chapters on technological neutrality, which the Court established as a foundational principle of copyright law. The scope of copyright is assessed in Part 4 with two chapters that canvas the exclusive rights under the copyright and the establishment of new "right" associated with user-generated content. Part 5 features two chapters on copyright collective management and its future in the aftermath of the Court's decisions. This volume represents the first comprehensive scholarly analysis of the five rulings. Edited by Professor Michael Geist, the Canada Research Chair in Internet and E-commerce Law at the University of Ottawa, the volume includes contributions from experts across Canada. This indispensable volume identifies the key aspects of the Court's decisions and considers the implications for the future of copyright law in Canada.

As an archivist or records manager it is essential to keep up to date with the complexities of copyright legislation, and *Copyright for Archivists and Records Managers* has been described as an 'unparalleled' resource for that purpose. What is copyright? Who owns it and for how long? What rights does it confer, and what are the limitations and exceptions? This comprehensive manual uniquely outlines copyright law in the UK with special reference to the unpublished materials commonly found in archive and records collections such as maps, legal records, records of local authorities and parish registers. It also gives comprehensive information on authorship and duration of copyright in older as well as modern works and on the wide range of exceptions and limitations to copyright, particularly those relevant to archivists, records managers, librarians and curators. It offers advice on rights in the electronic environment, moral rights and rights in databases and contains extensive tables of duration of copyright in other countries. The sixth edition of this respected work has been extensively revised and updated, in particular by: revision of the commentaries on the nature of originality in literary, dramatic, musical and artistic works and of a substantial part of a copyright work updating of the explanation of how a work of overseas origin qualifies for copyright protection in the UK, to reflect changes to the legislation revision of the commentaries on publication, issue of copies to the public and communication to the public more explanation of the exceptions for quotation, text and data mining, disability, rental and lending, education, broadcasts, access to digital material on the premises and the publication of older unpublished works updating of the charts for the duration of copyright where countries have amended their legislation This book will be useful reading for all archivists and records managers; LIS professionals in libraries, museums and galleries; students, researchers and genealogists.

This ground-breaking book critically interrogates how literary characters are regulated under copyright, moral rights, and trademark law, challenging important foundations that underscore engagement with literary characters. Using interesting examples, and referencing literary theory, *Literary Characters in Intellectual Property Law* offers an in-depth exploration of both the law and the diverse and conflicting interests that are impacted by literary character appropriation, incorporating the perspectives of owners, authors, appropriators, and consumers.

Intellectual Property Law is written in an informal, engaging and lively manner with an emphasis on explaining the key topics covered on intellectual property law courses with clarity. It focuses on the practical issues of United Kingdom law at the same time as demonstrating how the subject is being shaped by outside forces.

This brief considers the various stakeholders in today's mobile device ecosystem, and analyzes why widely-deployed hardware security primitives on mobile device platforms are inaccessible to application developers and end-users. Existing proposals are also evaluated for leveraging such primitives, and proves that they can indeed strengthen the security properties available to applications and users, without reducing the properties currently enjoyed by OEMs and network carriers. Finally, this brief makes recommendations for future research that may yield practical and deployable results.

The second edition of Sourcework, designed to help students make use of outside sources, has been updated and enhanced to better guide writers through the challenges of their first academic research papers. With new university-level readings and updated activities, this flexible text helps students master the writing and critical thinking skills necessary to produce strong academic essays using supporting evidence.

This book explores changing practice in history classrooms from the autonomy of the 1980s through the introduction of GCSEs and the National Curriculum to the prescription of the National Strategies and the pervasive influence of league tables in the first decade of the twenty-first century. It uses individual narratives from history teachers to shed light on a changing profession. Showcasing research that is crucial reading for leaders in education, it uses oral accounts from 13 experienced teachers to provide a rich testimony of the constraints and affordances acting on history teachers. The book offers a unique perspective to show how teachers experienced steady but substantial changes in policy and autonomy and how this affected their practice; this detail enhances an analysis of policy and curricular documents across three decades. The findings are crucial for educational settings today, facing crises of teacher recruitment and teacher retention. This book will be of great interest to academics and higher degree research students in history education, history of education and education policy. It will also be of interest to beginning history teachers and senior school leaders responsible for teacher development and curriculum.

Effective Australian history education has never been more important for the development of critically aware and thoughtful young people. History fosters important skills in reasoning, historical consciousness and empathy; and an appreciation of history is crucial to the development of students' understanding of the very nature of our society. This edited collection comprises contributions from leading historians, educators and practising teachers, and surveys Australian history teaching today, from the development of the national curriculum to fostering historical thinking and promoting effective engagement in the history classroom. The book begins with an analysis of the principles underlying the drafting of the national curriculum and features insights from the writers of the curriculum themselves. It focuses on the curriculum from primary- and secondary-school teaching perspectives. Part 2 examines the teaching of historical expertise including historical thinking and value formation, as well as productive assessment and the important role social history can play in the classroom. Part 3 concentrates on specific approaches to history teaching including teacher talk; the use of historical fiction and film; digital technology and the internet; as well as museums as a teaching medium. Part 4 analyses key aspects of Australian history teaching including Indigenous perspectives, teaching citizenship and assisting the pre-service teacher in their transition to becoming a professional. Rich with insights into historical skills, historical concepts and critical thinking, as well as practical guidance on translating principles into engaging classroom approaches, this is an essential reference for both pre-service and in-service history teachers and educators.

Showcases recent research by leading scholars working within the relevance-theoretic pragmatics framework.

This book explores the social and ideological importance of crime, and the great fascination it holds, from a linguistic angle. Drawing on ideas from stylistics, cognitive linguistics, metaphor theory, corpus linguistics, discourse analysis and pragmatics, it compares and contrasts the linguistic representation of crime across a range of genres.

This volume offers a novel approach to the world of adaptations through an intense cross-cultural study. The concept of 'adaptation' is extensively discussed here, exploring its meaning and relevance, as well as the various forms it takes. The book investigates what happens when three 20th century European plays, considered as landmark works of the age, are adapted to the Indian context in three different languages; discussing the dynamics and the results of this. It takes us into the minds of the creators – playwrights, adapters, directors, actors, and producers, and 'others'. The interviews with directors who suffused the western plays with Indian flavor and served them to the local audience also provide valuable insights about theatrical, cultural, and ideological concerns. It also represents an interesting collection of examples and analogies hand-picked from the wide space of literature, theatre, and cinema. It offers a comprehensive base for a thorough understanding of adaptations and the allied multi-disciplinary issues.

Thomas Northcote Toller and the Toller Memorial Lectures

European Geographic Information Infrastructures

Significant Anglo-Saxon papers, with postscripts, illustrate advances in knowledge of life and culture of pre-Conquest England. Thomas Northcote Toller, of the Bosworth-Toller Anglo-Saxon Dictionary, is one of the most influential but least known Anglo-Saxon scholars of the early twentieth century. The Centre for Anglo-Saxon Studies at Manchester, where Toller was the first professor of English Language, has an annual Toller lecture, delivered by an expert in the field of Anglo-Saxon Studies; this volume offers a selection from these lectures, brought together for the firsttime, and with supplementary material added by the authors to bring them up to date. They are complemented by the 2002 Toller Lecture, Peter Baker's study of Toller, commissioned specially for this book; and by new examinations of Toller's life and work, and his influence on the development of Old English lexicography. The volume is therefore both an epitome of the best scholarship in Anglo-Saxon studies of the last decade and a half, and a guide for the modern reader through the major advances in our knowledge of the life and culture of pre-Conquest England. , Contributors: RICHARD BAILEY, PETER BAKER, DABNEY ANDERSON BANKERT, JANET BATELY, GEORGE BROWN, ROBERTA FRANK, HELMUT GNEUSS, JOYCE HILL, DAVID A. HINTON, MICHAEL LAPIDGE, AUDREY MEANEY, KATHERINE O'BRIEN O'KEEFFE, JOANA PROUD, ALEXANDER RUMBLE.

This useful and richly informative book will inspire and motivate readers to appreciate the importance and relevance of philosophy in their everyday lives. A user-friendly format provides detailed content coverage and critical reasoning skills development. Its "applied focus" pays attention to the personal and practical relevance of philosophy by focusing on its experiential, therapeutic, and social applications--complemented by a built-in study guide and substantial excerpts from classical original sourceworks. Six chapters cover: what philosophy is, philosophies of life, logic and philosophical method, epistemology and metaphysics, ethics, and political philosophy. For individuals new to, and interested in, the study of philosophy.

While there are certainly numerous influences on individuals' learning and performance, cognitive strategies are the processes most directly related to making meaningful progress on a learning task or problem. Written by a leading expert on strategic processing, this book situates the topic within the broader context of educational psychology research and theory and brings it to a wider audience. With chapters on the fundamentals of domain-general and domain-specific strategies, connections to other constructs, and advice for instructing students, this concise volume is designed for any education course that includes learning or study strategies in the curriculum. It will be indispensable for student researchers and both pre- and in-service teachers.
