Disability and History

The burgeoning field of disability studies has emerged as one of the most innovative and transdisciplinary areas of scholarship in recent years. This special issue of Radical History Review combines disability studies with radical history approaches, demonstrating how disability studies cuts across regional histories as well as familiar disciplinary categories. Disability and History also discloses how the ways in which we define "disability" may expose biases and limitations of a given historical moment rather than a universal truth. Drawing on archival research and other primary materials, as well as on methods from labor history, ethnic studies, performance studies, and political biography, this special issue explores how historical forces and cultural contexts have produced disability as a constantly shifting and socially constructed concept. One essay examines how Western definitions of disability imposed during colonial rule shaped Botswanan perceptions of disability. Another looks at labor activism among blind workers in Northern Ireland in the 1930s; a third essay, drawing on previously untranslated political texts by disabled writers and activists from the Weimar era, dispels the simplistic assessment of the disabled as complacent in the face of the Nazis' rise to power. Other essays interpret U.S. radical Randolph Bourne as a philosopher of disability politics and chronicle the emergence of a disabled feminist theater practice in the 1970s and 1980s. Contributors. Teaching Adolescents With Disabilities:

Current Trends and Legal Issues in Special Education

A curriculum for teaching self-care skills to children with disabilities, using rhyming words and step-by-step illustrations, based on current theories of how the brain learns.

An Introductory Course in the Care and Prevention of Athletic Injuries

Self-Care with Flair!

The Vocational Rehabilitation Counselor Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to; Acquiring and maintaining employment; Principles and practices of employment counseling; Case histories of employment clients; Interviewing; Preparing written material; and more.

A Practical Guide for Teaching Self-Care Skills Through Pictures and Rhymes

Note: Each package contains 20 blank checklists. Developed as a component of the Ziggurat Model, the Underlying Characteristics Checklist (UCC) is an informal, nonstandardized assessment tool designed to identify characteristics across a number of domains associated with ASD. It is not designed or intended for diagnosis of ASD. The UCC is especially helpful for those working with infants through preschool aged individuals as the information gathered from the UCC provides a starting point for developing an IEP. The UCC and the Ziggurat Model in tandem lead to a program that is based on individual needs and uses the best practices in the field.
