This volume investigates African-American employment in banking and insurance in the United States. The authors describe how these once almost all-white industries are now employing large numbers of African-American and what problems remain to be solved before equal employment opportunity can be fully attained. Appendices tell the story of African-American-owned banking and insurance companies and their status today. Located in primarily urban areas, banks and insurance companies may soon be among the largest employers of African-Americans. The centralized personnel structure of banks gives them a significant advantage in employing African Americans, but the authors find

that both banks and insurance companies have been slow to employ black managerial personnel. This study is based upon individual reports first published in the Racial Policies of American Industry series. A final chapter compares and contrasts the situations in banking and insurance, paying particular attention to the reasons for varying progress in the two industries. Founded in 1921 as a separate Wharton department, the Industrial Research Unit has a long record of publication and research in the labor market, productivity, union relations, and business report fields. Major Industrial Research Unit studies are published as research projects are completed. This volume is Study no. 47.

Designed to complement the Mental Measurements Yearbooks, Tests in Print fills a pressing need for a comprehensive bibliography of all commercially available English language tests in print.

Although these volumes are useful in and of themselves, their maximum usefulness requires the availability and use of the Mental Measurements Yearbooks. Although information on available tests and specific test bibliographies is valuable, the greatest service which Tests in Print can perform is to encourage test users to choose tests more wisely by consulting the MMY test reviews, test reviews from journals, and the professional literature on the construction, use, and validity of the tests being considered. Tests in Print VI contains information on over four thousand testing instruments. Informative descriptions of each test include specific data on their purpose, population, scoring, and pricing. Indexes of test titles, publishers, acronyms, and subject classifications are provided, as well as notations on out-of-print tests. Specific information about testing is required by a wide range of professionals in areas such as education, psychology, counseling, management, personnel, health care, career planning, sociology, child development, social science, and research. Tests in Print VI also serves as a comprehensive index to the Mental Measurements Yearbook series by directing readers to the appropriate volume for reviews of specific tests.

Personality Tests and Reviews I, consists of the personality sections of the first six MMYs and Tests in Print I. These materials include a comprehensive bibliography on the construction, use, and validity of 513 personality tests, critical reviews of 386 personality tests by specialists in psychology and testing, and 136 excerpts from personality test reviews originally published in professional journals, and 268 excerpts from reviews of books dealing with specific personality tests.

The most widely acclaimed reference series in education and psychology, the Mental Measurements Yearbooks are designed to assist professionals in selecting and using standardized tests. The series, initiated in 1938, provides factual information, critical reviews, and comprehensive bibliographic references on the construction, use, and validity of all tests published in English. The objectives of the Mental Measurements Yearbooks have remained essentially the same since the publication of the series. These objectives include provision to test users of: factual information on all known tests published as separates in the English-speaking countries of the world candidly critical test reviews written for the MMYs by qualified professional people representing a variety of viewpoints excerpts of the critical portions of test reviews which have been published in professional journals comprehensive bibliographies, for specific tests, of references which have been examined for their relevance to the

particular tests listing of books on measurements and closely related fields, as well as excerpts of evaluative statements from reviews of these books in professional journals.
