...

The most common cause is congestive heart failure. Other causes include lung cancer, pneumonia, tuberculosis, liver disease, pulmonary embolism, lupus, and reaction to certain medications. Pleurisy is pain associated with inflammation of the pleural cavity. The most common cause is a viral infection, such as influenza.

Diseases of the pleura continue to affect a large population of patients worldwide and in the United States. Pleural

fluid analysis and accompanying imaging of the pleura including chest X-rays, chest computed tomography (CT) scan and chest ultrasonography are among the first steps in the management of pleural effusions.

Surgical Diseases Of The Pleura

Types of Pleural Diseases. Causes: Injury to the lung causing a leak of air, chronic obstructive pulmonary disease or other lung disease, tuberculosis, ruptured air blisters (blebs), mechanical ventilation Symptoms: Shortness of breath, rapid breathing, chest pain when taking a deep breath (pleurisy), cyanosis (bluish discoloration of the skin), ...

management of pleural effusions.

Thoracoscopy: medical versus surgical—in the management of

...

The introduction of the "mini-thoractomy" technique reduced the operative morbidity of open thoracotomy while hastening recovery. 10 More recently, thorascopic pleural evacuation and/or decortication have been shown to reduce not only hospital stay due to the infectious process, but also the morbidity of surgical decortication. 11,12,13 Subsequently, many centers now receive referrals for surgical intervention much earlier in the clinical course of parapneumonic effusions. Indeed, the ...

Category Archives: DISEASES OF PLEURA AND PLEURAL SPACE

Pleura is a serous membrane covering the lung parenchyma, mediastinum, diaphragm and the rib cage. It is divided into visceral pleura covering the lungs, mediastinum, lobar fissure and the parietal pleura which lines the thoracic cavities .

DISEASES OF PLEURA AND PLEURAL SPACE | Respiratory Diseases

Inflammation of the pleura, or pleurisy, is most commonly caused by viral infection. Congestive heart failure is a common cause of pleural effusion, an accumulation of excess fluid in the layers of tissue that line the chest cavity. Diseases of the pleura may be treated by open surgical procedures or through a thoracoscope.

About Pleural Disorders - CSA Medical Inc.CSA Medical Inc.

Malignant pleural effusion develops as a result of secondary pleural deposits, an extension of primary lung or breast cancers or sometimes a lymphatic flow obstruction. Breast cancer is the most common causative of malignant pleural effusion.
