Essentially any upgrade Suzuki did to their engines, you should also do to yours. There were two clear changes across the years, cam-belt width and camshaft castings. The MK2 and MK3 G13B engines had a wider cam-belt and pulleys, compared to the MK1. This was to reduce the chance of catastrophic cam-belt failure.

The new 1.2-litre engine although being 500 British Pounds (Rs 50,000) more expensive than the standard 1.2 engine enjoys a complete exempt of excise duty by the UK government for producing 99g/km of CO2 emissions. With Maruti Suzuki India preparing to launch the new facelifted swift, it is mostly likely that it will come with the new engine.
