It is important for anybody involved in sport and physical recreation to be aware of the legal context in which their activity takes place, to develop an understanding of their legal responsibilities and to know what might happen if something goes wrong. Sport, Physical Recreation and the Law is the first textbook on this difficult subject for students and practitioners in sport and physical recreation. Covering a wide range of legal principles and cases, this textbook introduces the reader to legal systems, terminology, databases and the use of case law. Designed to encourage analysis, reflection and the application of examples and ideas from the reader.'s own experience, the book clearly and comprehensively explains key topics such as: socio-legal aspects of sports violence and criminal liability negligence and defenses against negligence manslaughter by individuals and organizations in sport principles of natural justice, disciplinary tribunals and doping control, harassment and child protection risk management, statutory duties, and breaches of health and safety criminal liability – recognized sports, hazing, and cage fighting. Including over 300 exercises, hypothetical scenarios, investigative tasks and seminar activities, this book is an essential course text for all students of sport, recreation and the law, and an invaluable reference for coaches, physical education teachers and those who play, lead or organize sport and physical recreation.

Through further technological development and increased globalization, conducting business abroad has become easier, especially for Small and Medium Enterprises (SME). However, the legal issues associated with international commerce have not lessened in complexity, including the role of non-state rules. The book provides a comprehensive analysis of non-state rules in international commercial contracts. Non-state rules have legal authority in the national and international sphere, but the key question is how the legal authority can be understood and established. To answer this question this book examines first what non-state rules are and how their legal authority can be measured, it then analyses how non-state rules are applied in different scenarios, including the applicable law, as a source of law, or to interpret either the law or the contract. Throughout this analysis three other important questions are also answered: when can non-state rules be applied? when are they applied? and how are they applied? The book concludes with a framework and classification that leads to a deeper understanding of the legal authority of non-state rules. Providing a transnational perspective on this important topic, this book will appeal to anyone researching international commercial law. It will also be a valuable resource for arbitrators and anyone working in international commercial litigation.

Sports law has been growing with increasing rapidly over the years since the first edition of this book was published in 1999, regularly making headlines as well as leading to a developing body of law practiced by specialist lawyers. This revised work, by leading practitioners in the field, with a foreword by Lord Coe, provides a coherent framework for understanding the principles of sports law in this area, as well as a deep analysis of its key features. The subject is split into four main areas: the constitutional aspect of organised sport, including the disciplinary procedures of the various governing organisations; second, broadcasting and marketing resulting from the commercial exploitation, including sponsorship, of sports clubs, sporting events and players; and third, player's rights and obligations, which embrace a wide range of legal issues including club transfers and player contracts, and issues arising from employment (including discrimination law), personal injury and criminal law. Special attention is paid to the impact of EU and Human Rights law as well as to the influential jurisprudence of the Court of Arbitration for Sport. London 2012 provides an appropriate point at which to assess the current state of the law, as well as to look to the future. The target readership extends from solicitors, barristers and legal advisers, to sports organisations and clubs, corporations involved in marketing and sponsorship, media companies, academics teaching sports law, and sports administrators. 'I commend it to everyone who will be to administer sport as well as to those who have to advise the administrators or argue cases in the field on whatever side. It is a gold medal book.' * From the Foreword by Lord Coe KBE Media & Entertainment Law presents a contemporary analysis of the law relating to the media and entertainment industries both in terms of its practical application and its theoretical framework, providing a broad and comprehensive coverage of these fast changing branches of the law. Fully restructured to complement how media law is taught today in the digital age, this third edition explores recent updates in the law including the outcomes of the Google Spain case and the 'right to be forgotten', the use of drones in breach of privacy laws, internet libel and the boundaries of media freedom and press regulation following the Leveson inquiry. Media & Entertainment Law uses the most up-to-date authorities to explore privacy and confidentiality subjects, such as the Prince Charles 'black spider' letters, the Maximilian Schrems and the celebrity superinjunction PJS v Newgroup Newspapers cases. The book also covers defamation, contempt of court and freedom of information, plus Scots law. New to this edition: A brand new chapter is dedicated to exploring technology and the media, including contemporary issues such as the dark web, the surveillance state, internet censorship and the law and social media, including bloggers, vloggers and tweeters. The chapters on regulatory authorities have been expanded to provide greater clarification and explanation of broadcasting, press and advertising regulation, including the protection of journalistic sources and comparators with EU Law. The chapter on intellectual property and entertainment law has been streamlined to match media law courses more effectively. This text provides students with detailed coverage of the key principles, cases and legislation as well as a critical analysis of this vibrant subject.

This book demonstrates that the European Union (EU) can curtail the autonomy of FIFA and UEFA by building upon insights from the principal-agent model. The author argues that EU institutional features complicate control, but do not render the EU powerless, and that FIFA and UEFA can deploy a variety of strategies to mitigate control.

European Sports Law: Collected Papers 2nd edition contains the collected works (1989-2012) of Stephen Weatherill, Jacques Delors Professor of European Community Law, Somerville College, University of Oxford, United Kingdom, with an extensive introduction on the background and rationale for the selected papers. Stephen Weatherill is a leading academic and author on the subject of European Union law and professional sport. His work is at the highest academic standard and practice-oriented at the same time, which has a strong impact on major court cases and the development of international sports law in general. The updated 2nd edition is a vademecum for those involved with international sport and the challenges European law and sport provide and is an indispensable tool for administrators, managers, researchers, academics, marketers, broadcasters, advisers and practitioners. The book appears in the ASSER International Sports Law Series (ISSN: 1874-6926), under the editorship of Dr. David McArdle, Dr. Ben Van Rompuy and Marco van der Harst LL.M.

Over the past few years international courts have entered the scene of international law and existing institutions have started to play more significant roles. The present volume studies one particular dimension of their increasing practice: international judicial lawmaking. It observes that in a number of fields of international law, judicial institutions have become significant actors and shape the law through adjudication. The contributions in this volume set out to capture this phenomenon in principle, in particular detail, and with regard to a number of individual institutions. Specifically, the volume asks how international judicial lawmaking scores when it comes to democratic legitimation. It formulates this question as part of the broader quest for legitimate global governance and places it within the context of the research project on the exercise of international public authority at the Max Planck Institute for Comparative Public Law and International Law.

Olympic Education is tasked by both Olympism (Olympic Movement's underlying philosophy) and the United Nations to educate on human rights. This study explores how present this call is in contemporary European Olympic Education. National Olympic Education programmes from twelve countries are examined and compared: Armenia, Austria, Belarus, Croatia, Hungary, Israel, Germany, Lithuania, Portugal, Russia, Slovenia, and Spain. Responses by individuals with NOAs' leadership positions to a semi-standardized research questionnaire as well as written information by NOAs on implemented national Olympic Education programmes, collected during February-May 2021, are subjected to a content analysis. Results indicate that human rights are explicitly and implicitly included as an educational theme in contemporary Olympic Education programmes. Parallels between human rights education and Olympic Education can be drawn. About the author Rebekka Lang Fuentes studied B.A. Sport and Sports Science in Mainz. She received a scholarship from the European Commission for the international studies M.A. Sports Ethics and Integrity, an Erasmus Mundus programme in the field of international law.

Employment relations, much discussed in other industries, has often been neglected in professional sports despite its unique characteristics. The book aims to explore in detail the unique nature of the employment relationship in professional sports and the sport industry.

In this solutions-focused collection of sport corruption case studies, leading researchers consider how to re-establish trust both within sports organisations and in the wider sporting public. Inspired by the idea of 'moral repair', the book examines significant corruption cases and the measures taken to reduce further harm or risk of recurrence. The book has an international scope, including case study material from Europe, Asia, Africa, Australia and New Zealand, and covers important contemporary issues including whistleblowing, bribery, match-fixing, gambling, bidding for major events, and good governance. It examines the loss of trust at both national and international levels. Drawing on cutting-edge research, the book includes both on-field and off-field examples, from Olympic, non-Olympic, professional and amateur sports, as well as diverse academic and practitioner perspectives. Offering an important contribution to current debates and a source of reflection on best professional practice, Restoring Trust in Sport helps us to better understand why corruption happens in sport and how it can and should be addressed. This is invaluable reading for all advanced students, researchers, managers and policy makers with an interest in integrity in sport, sport ethics, sport management, sport governance, sports law, and a useful reference for anybody working in criminalology, business and management, law, sociology or political science.

The book explores the definition and nature of guerrilla tactics in international commercial arbitration. It analyses various such tactics deployed (pre-Covid and during Covid times) and portrays them in a way that enables one to visualise how, and possibly why, they might be deployed. Attempts to codify ethical standards and rules regulating the behaviour of legal representatives in international arbitration are examined. The book covers a range of culture clashes, addresses several elephants in the room, and looks at factors inherent in the arbitral process that create opportunities and increase temptations to misbehave. It considers the remedies and sanctions available in international arbitration and compares them to those available to the courts in civil litigation. In addition to recommendations for future research, the book offers solutions to curb the problem in line with party autonomy and with a critical analysis. "This manuscript is an essential solutions-based text that not only addresses a comprehensive range of modern-day guerrilla tactics in international commercial arbitration but also offers thoughtful methods to deal with the shenanigans that parties may bring to the arbitral process." - Chiann Bao, Independent Arbitrator, Arbitration Chambers and Vice President of the International Chamber of Commerce, Court of Arbitration "Dr. Ahuja's book is a thoughtful and highly practical contribution to the study of procedures in international commercial arbitration. It is replete with scholarly analysis, careful treatment of authority, pragmatic insights and policy discussions. Any practitioner or student of international arbitration would benefit from this volume." - Gary Born, Author, International Commercial Arbitration (3d ed. 2021) "A highly readable and informative book which identifies and analyses the numerous guerrilla tactics parties may attempt to deploy in international commercial arbitration, the factors which may encourage such behaviour, and practical mechanisms to keep the proceedings on track. Both erudite and practical, this book is a must-read for parties, counsel and arbitrators alike." - Prof. Benjamin Hughes, Independent Arbitrator, The Arbitration Chambers "Guerrilla tactics are a pertinent problem in arbitration. Dr. Ahuja's well written book not only describes the various tactics in a succinct way but provides extremely useful guidance on how to tackle them. It will be a primary source of reference for every practitioner faced with such tactics." - Prof. Dr. Stefan Kröll, Chairman of the Board of Directors of the German Arbitration Institute (DIS) "Taming the Guerrilla in International Commercial Arbitration offers a refreshingly candid and balanced discussion of 'sharp practices' in international arbitration. The book collects a wealth of information on guerrilla tactics previously only available in separate survey reports, articles, and guidelines on the topic. It additionally includes a chapter addressing tactics deployed in virtual or remote arbitrations due to the Covid-19 pandemic. The comprehensive research and analysis presented in this book make it a valuable resource to counsel, parties, arbitrators, academics, and those who deliver practical arbitration training. A must-read for those who want to better understand the practices that may lead some to disfavor arbitration and ways the arbitration community can respond to guerrilla tactics to improve the arbitration process for all participants." - Dana MacGrath, Independent Arbitrator, MacGrath Arbitration "From an unreasonable fad of a wise man who left both sides equally unhappy but resolved the disputes effectively, arbitration has evolved into a full-scale trial before a party chosen tribuna. Its informality and expedition puts in peril the fundamental right of the recalcitrant to delay proceedings. Dr. Ahuja has assiduously articulated the measures, apply christened Guerrilla Tactics, used to disrupt and derail arbitrations. An indispensable read for the practitioner and an insightful treatise for the policy maker." - Harish Salve SA QC, Blackstone Chambers "This book shines a spotlight on arbitration's dark arts - guerrilla tactics. Dr Ahuja illuminates this shadowy world with excellent (and much needed) scholarship that is practice-based and useful for all stakeholders in arbitration. His examination of the root causes of this problem, recommendations on how to control it, comparisons with litigation practice and suggestions for future

research marvellously combine to make this a work that is required to be consulted by all serious counsel, arbitrators, institutions and academics in the field of arbitration." - Romesh Weeramanjil, Head, International Dispute Resolution, Centre for International Law, National University of Singapore

Long established as the market leading textbook on sports law, this much-anticipated new edition offers a comprehensive and authoritative examination of the legal issues surrounding and governing sport internationally. Locating the legal regulation of sport within an explicit socio-economic context, this refocused edition is divided into four core parts: Governance & Sport Commercial Regulation; Sports Workplace, and Safety in Sport. Recent developments covered in this edition include: EU competition law interaction with sport under arts. 101 and 102 of the Treaty on the Functioning of the European Union; the current World Anti-Doping Agency code; analysis of the recent Court of Arbitration for Sport Jurisprudence; reforms of the transfer system in team sports; anti-discrimination provisions in sport; engagement with match fixing; a focus on the legal context of 2012 London Olympics. Essential reading for students studying sports law or sports-related courses, this textbook will also prove useful to sports law practitioners and sports administrators in need of a clear companion to the field. Match-fixing represents a greater potential threat to the integrity of sport than doping. It has been linked to organised crime, illegal drugs and money-laundering. Law enforcement and sporting authorities are struggling to establish legal and regulatory responses to this emerging threat, particularly in light of cross-border internet gambling. This book examines match-fixing and the legal responses to it in three key Asian sporting nations: Australia, Japan and Korea. It explores the significance of legal, regulatory and cultural differences, and draws lessons in terms of best practice and enforcement for legal and sporting authorities around the world. Including key insights from players, the betting industry, law enforcement and prosecution authorities, it discusses the strengths and weakness of current anti-corruption strategies in the three jurisdictions. Match-Fixing in Sport: Comparative Studies from Australia, Japan, Korea and Beyond offers important insights for all students and scholars with an interest in sport studies, law, criminology and Asian studies.

The important theme "What is Sports Law?" was the topic of the international Conference on "The Concept of Lex Sportiva Revisited", which took place in Jakarta in late 2010. Academics and practitioners are still in debate to agree on this concept as is evident in this book. This book not only contains the worked out contributions of this Conference, but also other related chapters on the subject. It produces a reassessment of the content of Sports Law and its terminology keeping a close eye on the current literature. The book appears in the ASSER International Sports Law Series, under the editorship of Prof. Dr. Robert Siekmann, Dr. Janwillem Soek and Marco van der Harst LL.M.

This book accounts for over 25% of the most influential cases in international sports law, as written by some of the leading authorities in the area. Authors from Europe, the United States, Australia, South Africa, Canada and New Zealand trace the evolution of this emerging discipline of law through an analysis of individual cases, as discussed under a number of key debates and themes in contemporary sports law, including: the "public" nature of legal disputes in sport; player employment mobility litigation; doping and the spirit of sport; TV rights holding proceedings; and enduring themes in sports law such as on-field violence, spectator safety, animal welfare and gender equality. Valuable for sports law academics, arbitrators and practitioners, sports administrators and governing bodies, but also for students (postgraduate and undergraduate) and all those with an interest in international sports law.

Handbook on International Sports Law

European Sports Law

The second edition of this comprehensive Handbook presents new and significantly revised chapters by leading scholars and practitioners in the burgeoning field of international sports law. National, regional and comparative dimensions of sports law are emphasized throughout, exploring a wide range of issues emerging in sports law today.

The Yearbook of International Sports Arbitration is the first academic publication aiming to offer comprehensive coverage, on a yearly basis, of the most recent and salient developments regarding international sports arbitration, through a combination of general articles and case notes. The present volume covers decisions rendered by the Court of arbitration for Sport (CAS) and national courts in 2016. It is a must-have for sports lawyers and arbitrators, as well as researchers engaged in this field. It provides in-depth articles on burning issues raised by international sports arbitration, and independent commentaries by esteemed academics and seasoned practitioners on the most important decisions of the year by the CAS and national courts. Dr. Antoine Duval is Senior Researcher for International and European Sports Law at the T.M.C. Asser Instituut in the Hague. He holds a Ph.D. on the interaction between Lex Sportiva and EU Law from the European University Institute in Florence. Prof. Antonio Rigozzi teaches international arbitration and sports law at the University of Neuchâtel, Switzerland, and is the partner in charge of the sports arbitration practice at Lévy Kaufmann-Kohler, a Geneva-based law firm specializing in international arbitration.

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Adopting a distinctive legal and political analysis, this book argues that the EU is receptive to the sports sectors claims for special treatment before the law. The book investigates the birth of EU sports law and policy by examining significant court decisions, the possibility of exempting sport from EU law, sport and the EU treaty, and more.

The interdependent coach-athlete relationship represents the most fundamental instance of a duty of care in sport. This book defines, analyses and clarifies the duty of care incumbent upon sports coaches and identifies important recommendations of real-world significance for coaching practice. Given the dynamic relationship between coaching, sport and the law, it is imperative that coaches have an informed awareness of the evolving legal context in which they discharge their duty of care. Detailed analysis of a coach's duty of care has so far been lacking. The book addresses this gap by being the first to critically scrutinise the concept of duty of care in the specific context of sports coaching. Sustained analysis of the developing case law allows the scope and boundaries of the particular duties demanded of coaches to be rigorously examined. The legal principles and court decisions discussed relate to coaching delivered in a wide range of individual and team sports, at both amateur and professional levels of performance, and include common scenarios and challenges frequently encountered by sports coaches globally. By adopting an interdisciplinary approach within a broader sociolegal methodological framework, this book's detailed analysis and original insights will prove highly instructive for practising coaches, coach educators, and national governing bodies of sport. It also offers extremely valuable insights for students, teachers and practitioners involved in sports law, sports coaching, sports ethics, tort law, sports policy and development, sports studies and physical education.

Sports marketing has become a cornerstone of successful sports management and business, driving growth in sport organisations and widening fan-bases. Showcasing the latest thinking and research in sports marketing from around the world, the Routledge Handbook of Sports Marketing goes further than any other book in exploring the full range of this exciting discipline. Featuring contributions from world-leading scholars and practitioners from across the globe, the book examines theories, concepts, issues and best practice across six thematic sections—brands, sponsorship, ambush marketing, anti-doping, sports, media, and ethics—and examines key topics such as: consumer behaviour marketing communications strategic marketing international marketing experiential marketing and marketing and digital media. Comprehensive and authoritative, the Routledge Handbook of Sports Marketing is an essential reference for any student or researcher working in sport marketing, sport management, sport business, sports administration or sport development, and for all practitioners looking to develop their professional knowledge.

In Regulating International Sport: Power, Authority and Legitimacy Lloyd Freeburn provides a ground-breaking account of the legal basis of regulatory power in international sport and outlines the reforms necessary to give the regime legality and legitimacy. Arbitration is the normal and preferred mode for resolving international commercial disputes. It presents an essential advantage over national courts by offering neutrality of adjudication, but is currently only available where both parties have consented to it. This innovative book proposes a fundamental rethink of this assumption and argues that arbitration should become the default mode of resolution in international commercial disputes.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Trinidad and Tobago deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are being addressed. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in Trinidad and Tobago will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

Sport has enjoyed steadily increasing prominence and economic importance since the Millennium. But threats to its integrity appear to have grown in parallel, undermining the very sense of innocence and fun which is an important part of its appeal. Threats to the spirit of sport come from internal, external and even state actors, who seek either to manipulate events on the field or to exploit the institutions of sport for their own ends. As the reputation of sport becomes more tarnished as a result, its sustainability as a significant part of the entertainment industry is called into question. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in Trinidad and Tobago will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

Match-Fixing and Sport studies match-fixing in historical perspective, revealing how match-fixing has always been a major sporting continuity, alongside another longstanding continuity, a widely-held belief in a mythical recent past of pristine purity. The volume begins with a brief overview of match-fixing's global contemporary context, the broad range of sports where it now participates, and the varied responses of leading sports organizations, legal gambling operators, police forces, governmental departments, and regulators. The following chapters explore the challenges of finding any reliable evidence of match-fixing in the past. An overview shows that match-fixing has been a major and substantial longstanding historical continuity in sport, usually but not always linked to gambling and sporting materialism. Examples are brought forward to show that it could be found in Ancient Greece and Egypt and was widespread across the early modern and modern periods around the globe. Overall, the volume assists scholars by suggesting some key questions which a future agenda for the historical study of match-fixing might address. Revealing how high-stakes betting, dishonest dealings and suspicious performances can be found throughout history, Match-Fixing and Sport will be of great interest to scholars of Sport History and Sport Ethics. This book was originally published as a special issue of The International Journal of the History of Sport.

Sports Law has quickly developed into an accepted area of academic study and practice in the legal profession globally. In Europe and North America, Sports Law has been very much a part of the legal landscape for about four decades, while in more recent times, it has blossomed in other geographic regions, including the Commonwealth Caribbean. This book recognizes the rapid evolution of Sports Law and seeks to embrace its relevance to the region. This book offers guidance, instruction and legal perspectives to students, athletes, those responsible for the administration of sport, the adjudication of sports-related disputes and the wider public who are interested in participation. The book explores national and international regulatory frameworks, identifying deficiencies and good practice, and concludes with recommendations for regulatory reform. Inclusion and Exclusion in Competitive Sport is important reading for anybody with an interest in the relationship between sport and wider society, sports development, sport management, sports law, or socio-legal studies.

Taming the Guerrilla in International Commercial Arbitration

This book undertakes a critical examination of commercial rights to sports mega-events (focusing on sponsorship), the exclusivity of such rights and the legal implications of the modern mega-event sponsorship model. It examines ambush marketing of events and the law's treatment of ambushing (specifically in the form of sui generis event legislation) in a review of 10 major jurisdictions selected on the basis of the importance of the events they are to host in the near future or have hosted recently, and the relevant domestic legislation. It critically examines the legitimacy of such commercial rights protection by means of the use of laws in the context of accepted principles of intellectual property law, competition law and human rights law. Specifically, it questions the legitimacy of the creation of statutory 'association rights' to mega-events, and considers potential future developments in respect of the law's treatment of mega-event commercialisation. Valuable for practitioners and academics (in the fields of sports law/sponsorship/marketing/intellectual property law); sports administrators (sports governing bodies); corporate sponsors of sports and other events; potential mega-event host governments and law-makers; civil rights organizations.

This book is an introduction to sports law, in particular International and European (EU) sports law. The chapters are all put in the perspective of the innovative sports law doctrine that is developed and presented in the opening chapter on what sports law is. After a general coverage of the core concept of 'sport specificity' (that is whether private sporting rules and regulations can be justified notwithstanding they are not in conformity with public law), the book covers the following specific main themes of International and European Sports Law (capita selecta): comparative sports law; competition law and sport; the collective selling of TV rights; sports betting; Social Dialogue in sport; sport and nationality; professional football transfer rules; anti-doping law in sport; transnational football hooliganism in Europe; international sports boycotts. In this book association football ("soccer") is the sport that is by far most on the agenda. It is the largest sport in the world and most popular all over the globe. The elite football in Europe is a day-to-day commercialized and professionalized industry, which makes it a perfect subject of study from an EU Law perspective.

'Lex Sportiva': What is Sports Law?

Taming the Guerrilla in International Commercial Arbitration

This book undertakes a critical examination of commercial rights to sports mega-events (focusing on sponsorship), the exclusivity of such rights and the legal implications of the modern mega-event sponsorship model. It examines ambush marketing of events and the law's treatment of ambushing (specifically in the form of sui generis event legislation) in a review of 10 major jurisdictions selected on the basis of the importance of the events they are to host in the near future or have hosted recently, and the relevant domestic legislation. It critically examines the legitimacy of such commercial rights protection by means of the use of laws in the context of accepted principles of intellectual property law, competition law and human rights law. Specifically, it questions the legitimacy of the creation of statutory 'association rights' to mega-events, and considers potential future developments in respect of the law's treatment of mega-event commercialisation. Valuable for practitioners and academics (in the fields of sports law/sponsorship/marketing/intellectual property law); sports administrators (sports governing bodies); corporate sponsors of sports and other events; potential mega-event host governments and law-makers; civil rights organizations.

This book is an introduction to sports law, in particular International and European (EU) sports law. The chapters are all put in the perspective of the innovative sports law doctrine that is developed and presented in the opening chapter on what sports law is. After a general coverage of the core concept of 'sport specificity' (that is whether private sporting rules and regulations can be justified notwithstanding they are not in conformity with public law), the book covers the following specific main themes of International and European Sports Law (capita selecta): comparative sports law; competition law and sport; the collective selling of TV rights; sports betting; Social Dialogue in sport; sport and nationality; professional football transfer rules; anti-doping law in sport; transnational football hooliganism in Europe; international sports boycotts. In this book association football ("soccer") is the sport that is by far most on the agenda. It is the largest sport in the world and most popular all over the globe. The elite football in Europe is a day-to-day commercialized and professionalized industry, which makes it a perfect subject of study from an EU Law perspective.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Ireland deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinctive regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in Ireland will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

Match-Fixing and Sport studies match-fixing in historical perspective, revealing how match-fixing has always been a major sporting continuity, alongside another longstanding continuity, a widely-held belief in a mythical recent past of pristine purity. The volume begins with a brief overview of match-fixing's global contemporary context, the broad range of sports where it now participates, and the varied responses of leading sports organizations, legal gambling operators, police forces, governmental departments, and regulators. The following chapters explore the challenges of finding any reliable evidence of match-fixing in the past. An overview shows that match-fixing has been a major and substantial longstanding historical continuity in sport, usually but not always linked to gambling and sporting materialism. Examples are brought forward to show that it could be found in Ancient Greece and Egypt and was widespread across the early modern and modern periods around the globe. Overall, the volume assists scholars by suggesting some key questions which a future agenda for the historical study of match-fixing might address. Revealing how high-stakes betting, dishonest dealings and suspicious performances can be found throughout history, Match-Fixing and Sport will be of great interest to scholars of Sport History and Sport Ethics. This book was originally published as a special issue of The International Journal of the History of Sport.

Sports Law has quickly developed into an accepted area of academic study and practice in the legal profession globally. In Europe and North America, Sports Law has been very much a part of the legal landscape for about four decades, while in more recent times, it has blossomed in other geographic regions, including the Commonwealth Caribbean. This book recognizes the rapid evolution of Sports Law and seeks to embrace its relevance to the region. This book offers guidance, instruction and legal perspectives to students
