We are all journalists and publishers now: at the touch of a button we can send our words, sounds and images out to the world. No matter whether you're a traditional journalist, a blogger, a public relations practitioner or a social media editor, everything you publish or broadcast is subject to the law. But which law? This widely used practical guide to communication law is essential reading for anyone who writes or broadcasts professionally, whether in journalism or strategic communication. It offers a mindful approach to assessing media law risks so practitioners can navigate legal and ethical barriers to publishing in mainstream and social media. This sixth edition has been substantially revised to reflect recent developments in litigation, and the impact of national security laws and the rising gig economy where graduates might work in the news media, PR, new media start-ups, or as freelancers. It covers defamation, contempt, confidentiality, privacy, trespass, intellectual property, and ethical regulation, as well as the special challenges of commenting on criminal allegations and trials. Recent cases and examples from social media, journalism and public relations are used to illustrate key points and new developments. Whether you work in a news room, in public relations or marketing, or blog from home, make sure you have The Journalist's Guide to Media Law at your side. 'Whether you're an MSM editor or reporter, a blogger, a tweeter or a personal brand, this book might save your bacon.' - Jonathan Holmes, former ABC Media Watch host 'The leading text book from which most journos learned their law' - Margaret Simons, associate professor in journalism, Monash University

This book, in its four editions, pioneered the emphasis on revenues and earnings recognition and realization which has been the story of the accounting difficulties of the past decade. The author has insisted on rigorous understanding of fundamentals and underlying principles, as well as the dynamics of accounting finance and law which lead to the issues lawyers face in the modern service economy today. Although the current popular interest in accounting fraud and planned changes in oversight give an impression of new issues, this work is further evidence of timeliness in well received teaching materials.
