Though nearly 5 million students can be characterized as gifted and talented in the United States, many exceptional learners “ fly under the radar. ” Because they are not appropriately challenged in the

general classroom, they never meet their full potential—in school or in life. Author Jenny Grant Rankin equips general classroom teachers with the information and strategies they need to spot, advocate for, engage, and challenge exceptional learners in their classrooms. Learn how to recognize the challenges of each child, identify the five unexpected traits of exceptional learners, and adjust your teaching to meet the needs of all learners. Filled with useful strategies and poignant personal accounts, this book gives you the “meat” of what you need to prevent those students who need to be challenged and engaged from slipping through the cracks. From the pages of *Teaching for High Potential*, a quarterly

publication of the National Association for Gifted Children, this collection of articles is sure to be of use to any educator of high-ability students. The featured articles are unique, well written for the audience, and selected by reviewers who understand what teachers need. Although most teacher education programs offer classes on special education and English language learners, teachers often do not receive any training in the needs of high-ability students or gifted education practices. This book: Help underserved high-potential students claim their right to an education that addresses their unique needs. In gifted education, an important and contentious issue that has yet to be sufficiently

addressed is the systemic underrepresentation of gifted students who have been discriminated against in school-based gifted and advanced learner programs because of their race, ethnicity, gender identity, sexual orientation, socioeconomic status, or other realities. Empowering Underrepresented Gifted Students gives a voice to those students and brings their stories into focus. With chapters written by student and expert scholars who specialize in addressing the structural inequity and educational inequality in gifted and advanced learner programs, Empowering Underrepresented Gifted Students recommends practices and strategies for helping underserved high-potential students claim their

right to an education that addresses their unique needs. Each chapter has key takeaways and discussion questions, providing a built-in book study guide to prepare educators to engage students in conversation and to help develop their self-advocacy skills. Coeditors Dr. Joy Lawson Davis and Deb Douglas have brought together the voices of experts and students to help educators move closer to ensuring equity, access, and excellence in gifted education. By arming historically marginalized gifted students with self-advocacy strategies, these remarkable students will be better enabled to fulfill their dreams.
