Objective: Characterize a 5-point Investigator's Global Assessment (IGA) tool and evaluate whether it meets the needs for a valid, clinically meaningful measure. Methods: A 5-point IGA tool was developed with input from regulatory authorities and clinical trial investigators involved with psoriasis drug development and evaluation. Associations between IGA 0/1 responder rates and PASI scores were evaluated using data from two phase 2 studies with the anti-interleukin (IL)-17A monoclonal ...

~~The 5-point Investigator's Global Assessment (IGA) Scale ...~~

The Psoriasis Area and Severity Index (PASI) score is most widely used as a primary endpoint in clinical trials, although it is not routinely used in clinical practice. Objective:

Characterize a 5-point Investigator's Global Assessment (IGA) tool and evaluate whether it meets the needs for a valid, clinically meaningful measure.

Herrera V. Meng X. Merola J.F. Background/Aims: In the
treat-to-target era, psoriasis disease activity measures that can
be easily performed in routine clinical practice are needed.
This retrospective pooled analysis explored cutoff values of
the product of the 5-point Investigator's Global Assessment
and percentage of affected body surface area ($IGA \times BSA$)
correlating with achievement of minimal disease activity
(MDA).
