The Black Death: Natural and Human Disaster in Medieval

...

The Black Death may be one of the most overlooked watersheds in human history. History turns its eyes more towards natural disasters, sackings of cities, gruesome battles, and intellectual and scientific discoveries to separate the modern from the pre-modern.

The Black Death: Natural and Human Disaster in Medieval ...

A fascinating work of detective history, *The Black Death* traces the causes and

far-reaching consequences of this infamous outbreak of plague that spread across the continent of Europe from 1347 to 1351. Drawing on sources as diverse as monastic manuscripts and dendrochronological studies (which measure growth rings in trees), historian Robert S. Gottfried demonstrates how a bacillus transmitted by rat fleas brought on an ecological reign of terror -- killing one European in three, wiping out ...

A summary of the Black

Page 9/34

Death - The Black Death - KS3 ...

Sep 1, 2016 Boban Docevski.

The black death was probably one of the most devastating pandemics known to man.

When the disease spread to Europe between 1346 – 1353, it killed an estimated 75 to 200 million people, about 30 – 60% of Europe ' s total population at the time.

Modern analysis of the Black Death shows us that the pathogen responsible was the *Yersinia pestis* bacterium.
