From strong sources to long-term exposure, gamma rays can cause radiation poisoning, which can result in cancer. Heavy doses of

Page 110/140

gamma ray exposure can result in death within just a few days to a few months. Acute radiation syndrome (ARS) results from long-term exposure to gamma rays and early

Radiation is the
emission (sending out)
of energy from any
source. There are many

Page 128/140

types of radiation,
ranging from very high-
energy (high-frequency)
radiation - like x-rays
and gamma rays - to very
low-energy (low-
frequency) radiation -

Page 129/140

the-effect-of-gamma-rays-on-man-in-moon-marigolds-paul-zindel

like radio waves. UV rays are in the middle of this spectrum.

Ultraviolet (UV)
Radiation

In gamma-ray astronomy,

Page 130/140

the-effect-of-gamma-rays-on-man-in-moon-marigolds-paul-zindel

gamma-ray bursts (GRBs) are extremely energetic explosions that have been observed in distant galaxies. They are the brightest and most energetic

Page 131/140

the-effect-of-gamma-rays-on-man-in-moon-marigolds-paul-zindel

electromagnetic events known to occur in the universe. Bursts can last from ten milliseconds to several hours. After an initial flash of gamma rays, a
