The Humans Who Went Extinct Why Neanderthals Died Out and We Survived Clive Finlayson. A fresh, ecological focus, looking at how scientists piece together clues about changing climate in the recent past, and how early peoples coped with it; Challengers readers' perspectives by emphasizing that we were not the only kind of human around

The Humans Who Went Extinct - Clive Finlayson - Oxford ...

Though Homo sapiens are the only species of human beings currently surviving, there were many other species which came before us. Here are 10 of the most interesting extinct human species. 1. Heidelberg Man. Homo Heidelbergensis inhabited regions in Eurasia and Africa around 600,000 years ago. They were taller and muscular than Homo sapiens.

The Humans Who Came Before Us – 10 Extinct Human Species

Human extinction is the hypothetical complete end of the human species. This may result either from natural causes or due to anthropogenic (human) causes, but the risks of extinction through natural disaster, such as a meteorite impact or large-scale volcanism, are generally considered to be comparatively low. Anthropogenic human extinction is sometimes called omnicide.

Human extinction - Wikipedia
