

## The Manufacture And Use Of The Functional Foot Orthosis

v. man · u · fac · tured, man · u · fac · tur · ing, man · u · fac · tures. v.tr. 1. a. To make or process (a raw material) into a finished product, especially by means of a large-scale industrial operation. b. To make or process (a product), especially with the use of industrial machines. 2. The only manufacturing industries of much importance are the preparation of sugar, coffee and tobacco for market, and the manufacture of cigars, cigarettes, straw hats, soap, matches, vermicelli, sash, doors, ice, distilled liquors and some machinery. The development of CAD and CAM and particularly the linkage between the two overcame traditional NC shortcomings in expense, ease of use, and speed by enabling the design and manufacture of a part ...
