According to Pépin's 2011 book, *The Origins of AIDS*, the virus can be traced to a central African bush hunter in 1921, with colonial medical campaigns using improperly sterilized syringe and needles playing a key role in enabling a future epidemic. Pépin concludes that AIDS spread silently in Africa for decades, fueled by urbanization and prostitution since the initial cross-species infection.

### ~~History of HIV/AIDS — Wikipedia~~

Origin of HIV and AIDS: AVERT. HIV Originated With Monkeys, Not Chimps, Study Finds: National Geographic . HIV pandemic originated in Kinshasa in the 1920s, say scientists: The Guardian .

### ~~History of AIDS — HISTORY~~

AIDS - AIDS - The origin of HIV: Details of the origin of HIV remain unclear. However, a lentivirus that is genetically similar to HIV has been found in chimpanzees and gorillas in western equatorial Africa. That virus is known as simian immunodeficiency virus (SIV), and it was once widely thought to be harmless in chimpanzees.

### ~~AIDS — The origin of HIV | Britannica~~

In "The Origins of AIDS" Jacques Pepin, an expert in infectious diseases who has spent many years working in Africa, explains how HIV spread from a few cases in the Congo in the 1920s to the pandemic it is today. The story begins with SIV (Simian Immunodeficiency Virus) which is present in chimpanzees and is genetically identical to HIV.

### ~~The Origins of AIDS: Amazon.co.uk: Pepin, Jacques ...~~

In 1983, scientists discovered the virus that causes AIDS. The virus was at first named HTLV-III/LAV (human T-cell lymphotropic virus-type III/lymphadenopathy-associated virus) by an international scientific committee. This name was later changed to HIV (human immunodeficiency virus).
