~~ROOT CAUSES
OF
BIODIVERSITY
LOSS - CIESIN~~

Regardless of the amount of species out there that are under pressure, a much more

Page 38/120

important
conclusion of the
report is that the
causes of biodiversity
loss are mainly
outside protected
areas and increasing
in size: habitat loss
and deforestation for
agriculture is one of
the most important
of these drivers, but

Page 39/120

large-scale fishing,
pollution and
climate change are
also important
causes.

~~Biodiversity and the
blind spot of nature
conservation ...~~

The root causes of
the pandemics are
also the driving force

Page 40/120

the-root-causes-of-biodiversity-loss

behind the erosion of biodiversity and climate change: human activities. Changes in land use, the expansion and intensification of agriculture and the trade and consumption of wildlife, disrupt ecosystems, promote

Page 41/120

proximity between
humans and wildlife,
livestock and
humans and thus
with the pathogens
they carry.
