One of the best works in Praxeology and Philosophy of History. "Behaviorism proposes to study human behavior according to the methods developed by animal and infant psychology. It seeks to investigate reflexes and instincts, automatisms and unconscious reactions. But it has told us nothing about the reflexes that have built cathedrals, railroads, and fortresses, the instincts that have ...

Theory and History: An Interpretation of Social and Economic Evolution is a treatise by Austrian school economist and philosopher Ludwig von Mises. It can be thought of as a continuation in the development of the Misesian system of social science. In particular, it provides further epistemological support for his earlier works, esp. Human Action.
