Principles of
Forensic Toxicology
Forensic Medicine
is an old medical
discipline defined
as “that science,
which teaches the
application of

Page 45/105

to-forensic-medicine-toxicology

every branch of medical knowledge to the purpose of the law” (Alfred Swaine Taylor). Forensic Medicine deals with medical evidence not only in practice but also in research and furthermore all legal essentials in

Page 46/105

to-forensic-medicine-toxicology

health care
especially for
doctors are part of
teaching, training
and research.
Several steps in
the development
of Forensic
Medicine can be
distinguished: At
first the use of
medical knowledge

Page 47/105

to-forensic-medicine-toxicology

for legal and public purposes. Secondly the compulsory medical testimony for the guidance of judges. Thirdly the professionalization as an own academic discipline. The development and existence of a

Page 48/105

speciality of
Forensic Medicine
depends
essentially on two
factors: on a
sufficiently high
development of
the law and on a
sufficiently high
development of
medicine. The
period of

Page 49/105

professionalization
of Forensic
Medicine as an
own academic
discipline started in
the 19th century,
especially in Paris,
Vienna, London,
Edinburgh, Berlin.
Since then the
world has changed
dramatically and

Page 50/105

witnesses of a
rapid, deep-rooted

Already 40 years
ago Professor
Bernhard Knight
wrote in a survey

in Europe: “In all aspects of life, the exchange of information on an international level can do nothing but good and legal medicine is no exception.” This book on the History of Forensic Medicine is an

Page 52/105

to-forensic-medicine-toxicology

approach in this direction. Forensic Medicine has a long and rich tradition since medical expertise has to face legal questions and new questions and developments raised by the society. The aim of

Page 53/105

this book is to address the state of Forensic Medicine in different countries worldwide. With contributions from Europe, China, Japan, the United States and the United Arab Emirates.
