

Trade Drawing Sp ecifications

A technical drawing, also known as an engineering drawing, is a detailed, precise diagram

or plan that conveys information about how an object functions or is constructed. Engineers, electricians and contractors all use these drawings as guides when

constructing or
repairing
objects and
buildings. Why
are technical
drawings
important?

sections,
details,
schedules and
diagrams."
Again, there is
no mention of
where those
things appear,
or what the
size of the
paper is.

What's the

Page 40/148

trade-drawing-specifications

**difference
between
drawings and
specifications?**

A drawing is a specification which needs to be communicated. The information may be communicated electronically

or in a hard
copy format.
The drawing
needs to be of
a suitable
scale for
duplicating and
of a sufficient
scale such that
if is micro-
copied it can
be suitable
magnified

without loss of
quality. ?
Drawings must
be language-
independent.

3 Produce a trade
drawing 3.1 Use
quality criteria to
create a working
drawing that correctly
represents a pattern

piece or garment 3.2
Draw lines accurately
to represent garment
specifications 3.3
Identify and label
relevant parts of
drawing and include
notes relating to
construction and
design features 4
Check and complete
work 4.1 Assess trade
drawing against

design specifications
and quality criteria
Other examples of
notes which can be
found on a drawing
will include: • All
timber attached to
brickwork must be
coated with wood
primer; • The wall
cavity below the floor
level must be filled
with weak concrete; •

Page 131/148

The size of the shower tray must be minimum 900 mm x 900mm; • The shower cubicle must be fitted with a shower curtain; • All the walls must be painted with three coats of paint; • The top four courses of the cavity wall below the wall plate must be built solid; • All ...

Page 132/148

Specifications describe the products, materials and work required by a construction contract. They do not include cost, quantity or drawn information, and so need to be read alongside other information such as quantities, schedules and drawings .

Trades | Barratt Commercial Support

A selected item drawing defines refined acceptance criteria for an existing item under the control of another design activity which requires further selection, restriction, or testing for such

characteristics as fit, tolerance, material (in cases where alternate materials are used in the existing item), performance, reliability, etc., within the originally prescribed limits. This drawing establishes new item identification for the selected item.

USE OF DRAWINGS AND

Page 135/148

trade-drawing-specifications

SPECIFICATIONS

Construction drawings are the main basis for defining required construction activities and for measuring quantities of material. Accurate estimating requires a thorough examination of the drawings. All notes and references should be read carefully, and all details and reference

Page 136/148

trade-drawing-specifications

drawings should be examined.

v PREFACE The GSFC Engineering Drawing Standards Manual is the official source for the requirements and interpretations to be used in the development and presentation of engineering drawings and related documentation for the GSFC.

Page 137/148

trade-drawing-specifications

Specifications. Precise written presentation of the details of a plan.

Structural plans. A set of engineered drawings used to support the architectural design.

Symbol. A drawing that represents a material or component on a plan. ...

Construction drawings trade terms. 37 terms.

MrShu2.

Specification writing is

Page 138/148

trade-drawing-specifications

often a distinct professional trade, with professional certifications such as "Certified Construction Specifier" (CCS) available through the Construction Specifications Institute and the Registered Specification Writer (RSW) through Construction Specifications Canada.

Page 139/148

trade-drawing-specifications

Specification writers are either employees of or sub-contractors to architects, engineers, or ...

Trades. Welcome to our trade page! Here you will find a host of different resources available for you to browse and use. We will use

Page 140/148

trade-drawing-specifications

this page to promote
the trade
specifications, make
you aware of our
current requirements
and much much
more.

Drawings are
defined as "the
graphic and pictorial
portions of the
Contract Documents

Page 141/148

trade-drawing-specifications

showing the design, location and dimensions of the Work, generally including plans, elevations, sections, details, schedules and diagrams."

Again, there is no mention of where those things appear, or what the size of

the paper is.

A drawing is a specification which needs to be communicated. The information may be communicated electronically or in a hard copy format. The drawing needs to be of a suitable scale for duplicating

and of a sufficient scale such that if it is micro-copied it can be suitably magnified without loss of quality. ?

Drawings must be language-independent.

Specifications •

Specifications are agreed upon defined requirements for a

Page 144/148

trade-drawing-specifications

product •
Specifications are a
type of Standard
defined by a
governing body •
Specifications may
have embedded
drawings but may
focus more on text •
There are effectively
two types of
specifications; • 1.

Page 145/148

trade-drawing-specifications

Design or Product
Specifications (what
is wanted) • 2.
