

Transforming Government And Building The Information Society Challenges And Opportunities For The Developing World Innovation Technology And Knowledge Management

Transforming Government And Building The

Based on our recent research and perspectives shared by current and former government leaders, this special report identifies seven drivers for transforming government in the years to come. The IBM Center continues to execute on its ultimate mission: to assist public sector executives and managers in addressing real world problems with practical ideas and original thinking to improve government. Alison Pritchard, Director General, Government Digital Service comments that digital accessibility is transforming government to meet user needs. When GDS says accessibility is everyone's responsibility, we mean it. Even royalty, as Prince Charles and the Duchess of Cornwall found out when visiting the Cabinet Office: the duo seemed impressed by a demo of assistive technologies reading GOV ...
