Retaining its
accessible and user-
friendly style, the
aim of this book
remains the same:
to provide nurses
with as much
relevant information
as possible about
the most commonly

requested
laboratory rests.
This is not a book
about laboratory
technique - its focus
is on the clinical
significance of test
results, and
therefore the
patient.

Anemia is a condition that occurs when the amount of hemoglobin in a person's blood drops below normal. A decrease in hemoglobin is often associated with a decrease in the number of red blood cells (RBCs) and he

matocrit. Hemoglobin is contained within RBCs and is necessary to transport and deliver oxygen from the lungs to the rest of the body.
