Praise for Can't Take It With You "Lewis Cullman is one of this nation's major and most generous philanthropists. Here he combines a fascinating autobiography of a life in finance with a powerful expose' of how the business of giving works, including some tips for all of us on how to leverage our money to enlarge our largesse." -Walter Cronkite "Lewis Cullman has woven a rich and seamless fabric from the varied strands of his business, philanthropic, and personal life. Every chapter is filled with wonderful insights and amusing anecdotes that illuminate a life that has been very well lived. This book has been written with an honesty and candor that should serve as a model for others." -David Rockefeller "Lewis Cullman's memoir made me feel good. A vibrant, thoughtful, and gracious man has written a wonderful tale about living a full life and giving back a lot to society." -Arthur Levitt Former Chairman, Securities and Exchange Commission "I was so enjoyably exhausted after reading the book-I can only imagine living the life! It seems there is no good cause that Lewis has not supported, no good business opportunity that Lewis has missed, and no fun that Lewis has not had." -Agnes Gund President Emerita, The Museum of Modern Art "Now I know that

venture capitalism and horse trading are almost as much fun as looking for new species in the Amazon. This book is exceptionally well written. The prose is evocative, vibrant, and inspirational." -Edward O. Wilson Professor Emeritus, Harvard University Honorary Curator in Entomology, Harvard's Museum of Comparative Zoology

This book provides an overview of beach management tools, including carrying capacity, beach nourishment, environmental and tourism awards (like Blue Flag or others), bathing water quality, zoning, beach typologies, quality index, user's perception, interdisciplinary beach monitoring, coastal legislation, shore protection, social and economic indicators, ecosystem services, and coastal governance (applied in beach case studies). Beaches are one of the most intensely used coastal ecosystems and are responsible for more than half of all global tourism revenues, and as such the book introduces a wide range of state-of-the-art tools that can be used to deal with a variety of beach challenges. Each chapter features specific types of tools that can be applied to advantage in beach management practices. With examples of local and regional case studies from around the globe, this is

a valuable resource for anyone involved in beach management.

The book makes accessible a selection of speeches and television appearances by Fidel Castro during the first two years of the Cuban Revolution, allowing for a fresh analysis of his ideological evolution towards socialism.

La historia de la telefonía en tanto que manifestación de la comunicación humana posee una extensa bibliografía a escala mundial. Desde la invención de la segunda mitad del siglo XIX, hasta hoy día ha sido una de las tecnologías a cuyos cambios aparecen con trazos muy acentuados en todas las etapas históricas de su desarrollo. A medida que se produce el auge del capitalismo, la telefonía cuantitativamente acrecida, va adquiriendo una gran diversidad de desarrollos de acuerdo con la riqueza, las características y el avance desigual de los países y regiones. A la necesidad de una historia circunscrita geográficamente, y no por ello ajena a la más general, responde esta obra. Su autor, ha querido más que llenar un vacío, realizar una gran síntesis documentada, de la historia de la telefonía en Cuba, como fenómeno iniciado en un

laboreo historiográfico que no ha de cesar. En efecto, subraya los momentos esenciales del surgimiento del teléfono en La Habana en 1879, vinculado fundamentalmente a instituciones comerciales y privadas, en un período de crecimiento de las inversiones extranjeras, primero británica en el transporte, especialmente en los ferrocarriles y después norteamericana en la industria azucarera y la minería en lo fundamental.

Cuba Betrayed, first published in 1962, is an autobiographical work of former Cuban dictator Fulgencio Batista, in which he expresses his viewpoint regarding his two terms as dictator, his defeat, and his successors—Cuba's "Betrayers." "The book is not meant to be a literary masterpiece. Still less has there been any attempt at stylistic elegance. It is, rather, an exposition of facts, a narration based on memory and notes."—Introduction

If you want to improve your middlegame play, you will have to develop a FEEL for positions. That's what Boris Zlotnik has been stressing during his long and rich trainer's career. Clicking through concrete variations (a popular pastime in the computer era) is not enough. To guide your thinking during a game you should be able to fall back on a reservoir of typical ideas and methods. That is exactly what this book offers you: Zlotnik's legendary study material about the middlegame, modernized, greatly extended and published in the English language for the first time. As you familiarize yourself with the most important strategic ideas and manoeuvres in important basic opening structures, you will need less time to discover the clues in middlegame positions. You will find it so much easier to steer your game in the right direction after the opening has ended. Zlotnik's Middlegame Manual is accessible to a wide range of post-beginners and club players. It is your passport to a body of instructive material of unparalleled quality, collected during a lifetime of training and coaching chess. A large collection of exercises, carefully chosen and didactically tuned, will help you drill what you have learned. With a foreword by Fabiano Caruana.

In the Land of Mirrors is a journey through the politics of Cuban exiles since the 1959 Cuban Revolution. It explores the development of Cuban exile politics and identity within a context of U.S. and Cuban realities, as well as within the broader inquiry of the changing nature of nation-states and its impact on the politics and identity of diaspora communities. Topics covered include: the origins of the post-revolution exile enclave of the 1960s; the evolution of the Cuban community over the 1960s; the pluralization of exile politics in the 1970s, particularly regarding the relationship with the island; the emergence of Cuban-American political action committees in the 1980s; post-Cold War developments; and the transition of Miami by the coming of age of a second generation of Cuban-Americans and the arrival of a new wave of exiles. Interspersed with vignettes from the author's own experiences and political activism. In the Land of Mirrors explores the meanings and ramifications of exile, of belonging, and of seeing the self in the other. It will appeal to political scientists, Latin Americanists, and those studying the politics of exile. María de los Angeles Torres was born in Cuba and came to the United States as a young child. She is Associate Professor of Political Science, DePaul University.

*Chronologically examining the nature of his art within the context of mass media and photojournalism, this handsome volume charts the thirty-year career of the artist and photographer Christopher Williams (b. 1956). Featuring 100 color illustrations, the book also includes a trio of essays by authors Mark Godfrey, Roxana Marroci, and Matthew S. Witkovsky that demonstrate how Williams, with high craft and a critical eye, deliberately engages yet reinterprets the conventions of photojournalism, picture archives, and commercial imagery through uncanny mimicry. Committed to the history of photography as a medium of art and intellectual inquiry, Williams's current series tackles the interplay of photography and cinema, upending viewer expectations and the role of spectacle"--

Found in a variety of forms, cacti and other succulents have elicited widespread interest and tremendous popularity worldwide. Although the subject of a certain amount of debate, about 10,000 species are recognized as belonging to the succulent group. Of these, an estimated 2,000 are threatened with global extinction in the wild and many more are regionally or nationally threatened mainly due to habitat destruction and collection for international trade. This Action Plan brings together from around the world current information on population status, threats and conservation of this particularly important group of plants. Prepared with conservationists, scientists, governments, protected area managers and grant-awarding bodies in mind, it suggests priorities for action and encourages collaboration among interested parties at all levels.

"The USA Today bestseller" Surprise... your target. Kill... your enemy. Vanish... without a trace. From Pulitzer Prize finalist Annie Jacobsen unveils-like never before-a complex world of individuals working in treacherous environments populated with killers, connivers and saboteurs. Despite Hollywood notions of off-book operations and external secret hires, covert action is actually one piece in a colossal foreign policy machine. Written with the pacing of a thriller, SURPRISE, KILL, VANISH brings to vivid life the sheer pandemonium and chaos, as well as the unforgettable human will to survive and the intellectual challenge of not giving up hope that define paramilitary and intelligence work. Jacobsen's exclusive interviews-with members of the CIA's Senior Intelligence Service (equivalent to the Pentagon's generals), its counterterrorism chiefs, targeting officers, and Special Activities Division's Ground Branch operators who conduct today's close-quarters killing operations around the world-reveal, for the first time, the enormity of this shocking, controversial and morally complex terrain. Is the CIA's paramilitary army America's weaponized strength, or a liability to its

principled standing in the world? Every operation reported in this book, however unsettling, is legal.

This book addresses a broad range of issues concerning microplastic pollution, including microplastic pollution in various environments (freshwater, marine, air and soil); the sources, fate and effects of microplastics; detection systems for microplastic pollution monitoring; green approaches for the synthesis of environmentally friendly polymers; recovery and recycling of marine plastics; wastewater treatment plants as a microplastic entrance route; nanoplastics as emerging pollutants; degradation of plastics in the marine environment; impacts of microplastics on marine life; microplastics: from marine pollution to the human food chain; mitigation of microplastic impacts and innovative solutions; sampling, extraction, purification and identification approaches for microplastics; adsorption and transport of pollutants on and in microplastics; and lastly, the socio-economic and environmental impacts: assessment and risk analysis. In addition to presenting cutting-edge information and highlighting current trends and issues, the book proposes concrete solutions to help face this significant environmental threat. It is chiefly intended for researchers and industry decision-makers; international, national and local institutions; and NGOs, providing them with comprehensive information on the origin of the problem; its effects on marine environments; with a particular focus on the Mediterranean Sea and coasts; and recent and ongoing research activities and projects aimed at finding technical solutions to mitigate the phenomenon.

The R language is a powerful open source functional programming language. At its core, R is a statistical programming language that provides impressive tools to analyze data and create high-level graphics. This book covers the basics of R by setting up a user-friendly programming environment and performing data ETL in R. Data exploration examples are provided that demonstrate how powerful data visualization and machine learning is in discovering hidden relationships. You will then dive into important machine learning topics, including data classification, regression, clustering, association rule mining, and dimension reduction.

The linear mixed model has become the main parametric tool for the analysis of continuous longitudinal data, as the authors discussed in their 2000 book. Without putting too much emphasis on software, the book shows how the different approaches can be implemented within the SAS software package. The authors received the American Statistical Association's Excellence in Continuing Education Award based on short courses on longitudinal and incomplete data at the Joint Statistical Meetings of 2002 and 2004.
