

Viva Questions And Answers Diffraction Grating Experiment

Diffraction: Explain diffraction of light. What is the difference between diffraction and interference? Distinguish between Fraunhofer and Fresnel ' s classes of Diffraction. What is the significance of this phenomenon? Object of what size is needed to diffract a light wave? Why is diffraction easily observed for sound waves but not light waves?

Diffraction is the bending of light around the corners of an obstacle or slit that is comparable in size to it ' s wavelength. What are Miller indices? Miller Indices are a method of describing the orientation of a plane or set of planes within a lattice in relation to the unit cell. They were developed by William Hallows Miller.

[FAQ : X-Ray Diffraction \[VIVA QUESTIONS\] - BragitOff.com](#)

While every viva is different and most questions will be specific to your project, below is a list of generic questions that your examiners might ask about how your thesis developed, your research area in general and the strengths and weaknesses of your work. Some find that preparing a few answers is a great way to build confidence beforehand and is often a good way to settle into the viva, as examiners sometimes start by asking basic, broad questions.

[40 practice questions for viva preparation — NDPH Student Blog](#)

1) Define Diffraction? Ans: The phenomenon of bending of light waves around the edges of obstacles and their spreading into the geometrical shadow of the obstacle is called diffraction of light. 2) Mention the two types of diffraction? Ans: i) Fresnel diffraction. ii) Fraunhofer diffraction.

[Commonly Asked Viva Questions: Diffraction Grating](#)

Viva Questions Determine the wavelength of the laser light by diffraction grating and demonstration. 1. ... In the quiz that is given below there are many diffraction grating experiment viva questions that will help you to understand this phenomenon and applications. what is grating element ? if this is your question. It has been clear to you know.
