Communication Perspectives

Harper's Weekly

Merchant Vessels of the United States

Official Gazette of the United States Patent Office

N.L.R.B. Election Report

Proceedings of the 11th World Congress on Engineering Asset Management

The field of organisational communication has been rapidly transforming in the wake of the linguistic and discursive turns that have been sweeping across the social sciences since the mid-eighties. These

'turns' have prompted organisational

communication scholars to look more closely at how they think about communication and its relationship to the organisation and the process of organizing.

What has emerged from these reflections is a perspective that proposes communication is not merely something that happens in organisations but is the heart of organizing and therefore actually constitutes the organisation. This perspective, which embraces several sub-threads, is now commonly referred to as the CCO (Communication as Constitutive of Organisation) perspective. This is itself evolving as scholars come to realize that organizing does not just occur at the discursive level.

It is inextricably coupled to the material and relational aspects of work – the discourse mutually constitutes relationships between human and non-human bodies that combine to create what we encounter when we participate in organisational life. This book examines the way these three dimensions combine to create organisational outcomes. In doing so, it advances CCO and sociomateriality scholarship and contributes to new ways of thinking about strategy and practice. The series of empirical studies should interest the widely interdisciplinary audience that seeks to understand work, organizing and management. This book was originally published as a special issue of the Communication Research and Practice journal.

Discursivity, Relationality and Materiality in the Life of the Organisation

Proceedings of the Grand Lodge of Wisconsin

The Official Railway Guide

These proceedings gather selected peer-reviewed papers from the 11th World Congress on Engineering Asset Management (WCEAM), which was held in Jiuzhaigou, China, on 25 – 28 July, 2016. These proceedings cover a wide range of topics in engineering asset management, including: · strategic asset management; · condition

monitoring and diagnostics; · integrated intelligent maintenance; · sensors and devices; · information quality and management; · sustainability in asset management; · asset performance and knowledge management; · data mining and AI techniques in asset management; · engineering standards; and · education in engineering asset management. The breadth and depth of these state-of-the-art, comprehensive proceedings make them an excellent resource for asset management practitioners, researchers and academics, as well as undergraduate and postgraduate students.
