Why did the dinosaur disappear?  
Contemporary scientists have  
their theories: Was it a massive

asteroid? Was it violent volcanic activity? Did the dinosaurs kill each other? Was it simply a matter of survival of the fittest? What amazing discovery did scientists make in a dinosaur dig in Wyoming that confirms what the Scriptures say?

## **Why did the dinosaurs disappear? New evidence – Learning Mind**

Why Did the Dinosaurs Disappear? By Karen Sapp  
Once dinosaurs lived on the earth. Then they disappeared or died out. What happened to them? Many other animals, including animals that lived in the sea and animals that flew

through the air also died out. Many plants died too. No one knows for sure what happened, but scientists have some ideas.

## **Why Did The Dinosaurs Disappear**

Large vegetarian dinosaurs started declining slowly at least 12 million years before the asteroid fell on their heads. It is not sure whether any species of dinosaurs would have survived if the huge asteroid had not fallen to Earth.

## **The Scientist's Mind: How did dinosaurs disappear?**

An impact calculator helps scientists paint a vivid picture of the immediate aftermath of the deadly asteroid strike. Imagine sunrise on the last day of the Mesozoic era, 66 million years ago. Shafts of sunlight rake through the swamps and coniferous forests along the coast of what is now Mexico's Yucatán Peninsula.

## **Here's What Happened the Day the Dinosaurs Died**

Dinosaurs disappeared when a meteorite hit the Earth and

*Page 8/31*

worldwide fires started. as a result of that smoke and dust blocked the sun for many years. Because of that, plants died. So... plant eating dinosaurs died and because of that, so did the meat eating ones.

## **Why did dinosaurs disappeared - Answers**

A recent explanation, supported by many scientists, suggests that dinosaurs died out soon after a huge meteorite crashed to Earth near the Gulf of Mexico. A giant meteorite, they reason, could have landed with an impact that kicked up enough dust and debris to block out sunlight for a

long time — leading to a deadly chain of events.

college and career and to do so, students need to know how to respond to different types of audiences. That is why I am engaging in Socratic Seminar in which we will discuss the question, "Why did the dinosaurs disappear?" Students will get the opportunity to write about what they learned.

## **Second grade Lesson Why Did the Dinosaurs Disappear? Day 1 ...**

The Cretaceous-Tertiary extinction event, or the K-T event, is the name given to the die-off of the dinosaurs and other species that took place some

65.5 million years ago. For many years, paleontologists believed this event was caused by climate and geological changes that interrupted the dinosaurs' food supply.
