“The best explanation that I have seen of corrosion on boats.”—Nigel Calder, author of Boatowner’s Mechanical and Electrical Manual “A powerful weapon in the war against metal deterioration.”—Cruising World Corrosion is a constant, often expensive, and sometimes dangerous problem for boaters. Moisture, salt, electrical currents, and chemicals create a potent combination that can attack the metallic (and sometimes nonmetallic) parts of your boat. Everett Collier, an expert in marine technology, details all the types of corrosion—including simple galvanic, electrochemical, and electrolytic—and explains how to identify, combat, and prevent them. The most comprehensive book on this subject, The Boatowner’s Guide to Corrosion shows you how to: Prevent corrosion with proper grounding, cathodic protection, protective coatings, and careful selection and matching of metal parts Protect your boat’s hull, deck gear, masts, and rigging, as well as its propulsion, electrical, plumbing, and steering systems Recognize and cure developing corrosion before it can damage your boat

Lovingly written and beautifully photographed, Best Boats is an evaluation of the most elegantly designed and best-built sailboats in stages—from a bare hull to a finished yacht. In addition to evaluating overall design, performance and layout, this book, like no other, analyses how and how well the boats are built. Ranging from the ageless Herreshoff day-sailer to the ultra-light Santa Cruz flyers, the book features some of the finest works of designers such as German Frers, Chuck Paine, Bill Crealock, Doug Peterson, Lyle Hess, and others. Even more importantly, it contains interviews with legendary builders such as Tom Morris, the Cherubinis, Cecil Lange, and Tom Dreyfus. Using the surveyed boats as examples, Máté; shows what to look for when contemplating the purchase of any sailboat. For the boatbuilder, it points out the weaknesses and strengths of all aspects of construction, using hundreds of photographs and illustrations to clarify.

A great designer offers you a virtuoso tour through the world of sailboats Bob Perry initiated the trend toward fast voyaging sailboats with his world-famous Valiant 40, which has been in production longer than any other cruising sailboat in history. But Perry is not only a leading yacht designer--he is also an accomplished wordsmith whose blunt, insightful, irreverent, and always entertaining boat reviews have captivated readers of Sailing magazine for 24 years. This book is vintage Perry, a no-holds-barred tour of the world of yacht design through the benchmark boats of his 30-year career.

Early in 1892, one of Norway’s finest boat builders launched a sailing legend. Over 100 years later Shane Granger and Meggi Macoun were peacefully enjoying a siesta when the great tsunami of 2004 changed their lives forever. Wwith thousands of people desperately in need, they loaded their boat with donated food and medical supplies then set sail for Sumatra. That voyage was the beginning of a rip-roaring real life sea tale complete with storms, adventures, exotic tropical islands, and heart-rending drama. Come feel the wind, smell the riggers tar, and taste the salt in this tale of a century old wooden sailing boat and her crew of intrepid adventurers as they take up their yearly 7,500-mile journey to deliver over 25 tons of educational and medical supplies to some of our world’s most remote island communities. About the Author SHANE GRANGER (1948 - until his luck runs out) has been in love with the sea since he was seven years old. Having worked as a radio DJ, advertising photographer, boat builder, director of museum ship restoration, and bush pilot, he has always come back to the sea. Shane has sailed thousands of miles solo, most of that on a square-rigged brigantine he salvaged from a beach in West Africa - a vessel he once single-handedly sailed across the Atlantic without a functioning rudder. After walking across the Sahara Desert, and being kidnapped by bandits in Afghanistan, his greatest ambition in life is to find a comfortable niche where he can enjoy the healthy benefits of monotony and boredom. He currently lives on an ancient wooden sailing boat with his partner Meggi Macoun and their cat Scourge.

This densely illustrated, hands-on guide to diesel engine maintenance, troubleshooting, and repair renders its subject more user-friendly than ever before. Finally, boatowners who grew up with gas engines can set aside their fears about tinkering with diesels, which are safer and increasingly more prevalent. As in other volumes in the International Marine Sailboat Library, every step of every procedure is illustrated, so that users can work from the illustrations alone. The troubleshooting charts in the second chapter--probably the most comprehensive ever published--are followed by system-specific chapters, allowing readers to quickly diagnose problems, then turn to the chapter with solutions. Diesel engine systems covered include: mechanical; oil; fresh- and raw-water cooling; low- and high-pressure fuel; exhaust; starting; charging; transmission and stern gear.

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner’s Practical and Technical Cruising Manual and Boatowner’s Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

The coastal and archipelago areas in the Baltic Sea are popular destinations for a number of tourists. An important group of tourists is boaters, who visit the coastal areas during a short summer period. Boat owners are sometimes pictured as having a great interest for the nature and a willingness to do right. Pollution from pleasure boats such as discharges of oil and fuel, antifouling paints and cleaning agents have a negative impact on the coastal environment. Environmentally sound alternatives exist to some extent, but are not very common. Sustainable alternatives for boaters are lacking behind. One of the underlying purposes of this study was to understand how we can help boat owners change their behaviour and decrease the negative impact on the marine environment. The survey among boaters has been conducted in Finland, Sweden and Denmark with a web based survey ordered by the Keep Sweden Tidy Foundation together with Keep the Archipelago Tidy Association in Finland and the Danish Outdoor Council. The research was performed by SIFO Research International.

In his latest book, Calder walks the reader through the repair, maintenance, and setting up of the boat’s primary systems, including the electrical system, electronics equipment, generator sets, solar panels, wind and water generators, the engine, transmission, pumps, steering, waste disposal systems, and more. Destined to become a highly trusted companion aboard all types of boats for years to come.

This book contains the operator’s handbooks as well as the complete repair operation manuals for these still very popular marine and stationary engines.

While everyone knows the new White Star liner was the most glamorous and was full of millionaires when she sank, few appreciate just how luxurious she was. Even in Third Class, the accommodation was better than on First Class on many older ships. For thefirst time, Bruce Beveridge, Steve Hall and Scott Andrews look at the ship itself, and at her interior design and fittings. From cobalt blue Spode china and Elkington plate silverware in the a la carte restaurant to the design of the boilers and fixturesand fittings onboard the world’s most luxurious vessel, they tell the story of a liner built at the peak of the race between the British, French and Germans to build bigger and better ships. --from publisher description
